Brisbane. Q. 4001.

To whom It may Concern,

I believe that the increased rate of the water to be supplied to Mt. Larcom is going to make it very hard for my husband & I to live here.

We enjoy gardening & we try to keep our water usage to a minimum & to conserve it as much as possible, but the price increase will make it much harder for pensioners like ourselves to maintain one of our most enjoyable hobbies.

If these price increases for water go ahead, we will be forced to install tanks & we will not use water supplied by the G. W. B.

I am shocked at these calculations, and am asking you to please think about how this will effect our small rural community.

Yours faithfully.

Joan Beth KIRWIN.
