RE: PROPOSED RISE IN QUEENSLAND REGIONAL BUSINESSES POWER BILLS

I write to strongly object to the proposed price increase of electricity on 1 July 2016. Prices have risen considerably over the last 10 years – a period during which our gross turnover has actually declined substantially.

Our business employs 8 staff regionally, & any increase in power costs will have a very significant effect on our profitability, most likely impacting the ongoing commercial viability of our business.

Kind regards
