

To Queensland Competition Authority

We operate a small flood irrigated mixed farming enterprise. Twenty five plus years ago , at considerable expense we had three phase power installed because it was cheaper and more convenient than diesel motors.

We wish to record our shock and dismay that such increases in the tariffs for power could even be contemplated. What on earth is going on in the fair state of Queensland.

I do not see the need to reiterate all the figures to show the massive increases. I am sure you would be well aware of them.

Here in the driest continent where it is so important to be able to pump water about economically, a hike in costs like this is incredible.

We request that price increases be no more than the CPI
