

To Whom it May Concern

As a small landholder with an equally small channel allocation to cover the needs of our household and small orchard, I would like to register my concern about any further increase in fees. I understand a flat annual administration fee is charged regardless of the size of operation/water allocation. I would like to see more parity taking into the account the size of farms/water allocations. Therefore I wish to register my interest in receiving information relating to changes in water charges in the Mareeba/Dimbulah area.
