## Queensland Government

## Electricity Industry Code

made under the Electricity Act 1994

Seventeenth Edition: approved 16 July 2014 effective 25 July 2014

This Seventeenth Edition of the Electricity Industry Code-

- pursuant to section $120 \mathrm{~J}(3)$ of the Act, comes into effect on 25 July 2014; and
- replaces the Sixteenth Edition of the Electricity Industry Code which was approved on 13 May 2014 and came into effect on 1 July 2014.

## Amendment History

| Edition | Date made/approved by <br> the Regulator/Minister | Effective date |
| :---: | :---: | :---: |
| 1 | 9 December 2004 | 1 January 2005 |
| 2 | 20 July 2006 | 1 September 2006 |
| 3 | 29 June 2007 | 1 July 2007 |
| 4 | 31 July 2008 | 4 August 2008 |
| 5 | 20 November 2009 | 1 July 2010 |
| 6 | 22 March 2010 | 1 July 2010 |
| 7 | 21 April 2010 | 31 July 2010 |
| 8 | 18 February 2011 | 18 February 2011 |
| 9 | 30 June 2011 | 1 July 2011 |
| 10 | 15 August 2011 | 26 August 2011 |
| 11 | 21 May 2012 | 15 June 2012 |
| 12 | 28 June 2012 | 1 July 2012 |
| 13 | 26 February 2013 | 1 March 2013 |
| 14 | 18 December 2013 | 6 January 2014 |
| 15 | 22 April 2014 | 26 May 2014 |
| 16 | 13 May 2014 | 1 July 2014 |
| $\mathbf{1 7}$ | 16 July 2014 | 25 July 2014 |

## Electricity Industry Code Contents

CHAPTER 1: THIS CODE ..... 10
1.1 Introduction ..... 10
1.1.1 Code objective ..... 10
1.1.2 Scope of the Code ..... 10
1.1.3 Authority ..... 10
1.1.4 Date of effect ..... 11
1.1.5 Application ..... 11
1.1.6 Obligation to remedy ..... 11
1.1.7 Amendment of Code ..... 11
1.1.8 Interpretation ..... 11
1.1.9 Other relevant instruments ..... 11
CHAPTER 2: MANAGEMENT OF DISTRIBUTION BUSINESSES ..... 13
2.1 Application of this Chapter ..... 13
2.2 This clause is intentionally left blank ..... 13
2.3 Distribution Annual Planning Report ..... 13
2.3.1 Distribution Annual Planning Report ..... 13
2.4 Minimum service standards ..... 13
2.4.1 Deleted. ..... 13
2.4.2 Deleted ..... 13
2.4.3 Deleted ..... 13
2.4.4 Deleted ..... 13
2.5 Guaranteed service levels ..... 13
2.5.1 Distribution authorities ..... 13
2.5.2 Application ..... 13
2.5.3 Wrongful disconnection ..... 14
2.5.4 Connections ..... 14
2.5.5 Customer reconnection ..... 15
2.5.6 Hot water supply ..... 16
2.5.7 Appointments ..... 17
2.5.8 Planned interruptions ..... 17
2.5.9 Reliability ..... 18
2.5.10 Amount of GSL payments ..... 20
2.5.11 Claiming a GSL payment ..... 20
2.5.12 How a GSL payment is paid ..... 20
2.5.13 Small customers with card operated meters ..... 20
2.5.14 Processing claims ..... 21
2.5.15 Caps on entitlements ..... 21
2.5.16 GST ..... 21
2.5.17 Effect of a GSL payment ..... 21
2.5.18 Disputes about GSL payments involving a retail entity ..... 22
2.5.19 Review of guaranteed service levels ..... 22
2.6 Reporting and monitoring ..... 22
2.6.1 Distribution entity must monitor performance ..... 22
2.6.2 Reporting requirements ..... 22
CHAPTER 3: DeletedCUSTOMER CONNECTION SERVICES ..... 23
CHAPTER 3: CUSTOMER CONNECTION SERVICES ..... 24
3.1 Application of this Chapter ..... 24
3.2 Customer Information ..... 24
3.3 Standard connection contract ..... 25
3.3.1 Standard connection contract ..... 25
3.4 Minimum terms and conditions ..... 25
3.5 Liability ..... 26
3.5.1 No indemnity ..... 26
3.5.2 Restrictions on distribution entities' limitation of liability in negotiated connection contracts ..... 26
3.6 Disconnection ..... 26
3.6.1 Disconnection ..... 26
3.6.2 Disconnection procedures ..... 27
3.6.3 Limitations on disconnection ..... 28
3.7 Small customer's liability for connection services ..... 28
3.8 Billing ..... 29
3.9 Differing terms and requirements ..... 29
3.9.1 Differing terms and requirements ..... 29
CHAPTER 4: CUSTOMER RETAIL SERVICES ..... 31
4.1 Application of this Chapter ..... 31
4.1.1 Application of this Chapter ..... 31
4.2 Retail contracts ..... 32
4.2.1 Terms of standard retail contract ..... 32
4.2.2 Notice of contract where no application made ..... 32
4.2.3 Minimum terms and conditions for negotiated retail contracts ..... 32
4.2.4 Cooling-off ..... 33
4.2.5 Compliance with applicable regulatory instruments ..... 34
4.2.6 Commencement of financial responsibility under negotiated retail contracts ..... 34
4.2.7 Laws of Queensland to govern negotiated retail contracts ..... 34
4.2.8 No indemnity ..... 34
4.2.9 Restrictions on retail entities' limitation of liability in negotiated retail contracts ..... 34
4.2.10 Identifying who is obliged to offer a standard retail contract ..... 35
4.3 Commencement of standard retail contracts ..... 35
4.3.1 Commencement of standard retail contracts ..... 35
4.4 Ending of retail contracts ..... 36
4.4.1 When a standard retail contract ends ..... 36
4.4.2 Term of a negotiated retail contract ..... 37
4.4.3 Termination of retail contracts by retail entities ..... 38
4.4.4 Expiry of fixed-term contracts ..... 38
4.4.5 Notice period ..... 38
4.4.6 Transitional notice period ..... 39
4.4.7 Expiry of fixed-term benefits ..... 39
4.5 Customer Information ..... 40
4.5.1 Obligation to prepare Customer Information ..... 40
4.6 Dealing with small customers ..... 40
4.6.1 Retail entities to prepare enquiry procedures ..... 40
4.6.2 Approval and implementation of enquiry procedures ..... 41
4.6.3 Complaint handling ..... 41
4.6.4 Customer communications ..... 41
4.7 Applications and connections ..... 42
4.7.1 Retail entities' requirements ..... 42
4.7.2 Retail entities' requirements when a small customer moves in without first making an application for services ..... 42
4.7.3 Use of credit history information where a small customer seeks a standard retail contract ..... 42
4.7.4 Retail entities' obligations to advise the distribution entity of connection applications ..... 43
4.8 Illegal use ..... 43
4.8.1 Retail entities' rights of recovery for illegal use ..... 43
4.8.2 Non-application of payment difficulties ..... 43
4.9 Billing ..... 43
4.9.1 Obligation to bill quarterly* ..... 43
4.9.2 How bills are issued ..... 44
4.9.3 Information on charges which comprise a bill ..... 44
4.9.4 Simultaneous payments for gas and electricity ..... 44
4.9.5 Other goods and services to a small customer ..... 44
4.9.6 Particulars on each bill ..... 45
4.9.7 Average daily usage ..... 46
4.9.8 Historical billing data ..... 46
4.9.9 Bill format ..... 46
4.10 Meter reading ..... 46
4.10.1 Meter reading for billing purposes ..... 46
4.10.2 Advice that a bill is estimated ..... 47
4.10.3 Adjustments to subsequent bills ..... 47
4.10.4 Pass through of cost where access is denied ..... 47
4.10.5 Unmetered supplies ..... 47
4.11 Undercharging and overcharging ..... 48
4.11.1 Recovery of undercharges from small customers ..... 48
4.11.2 Process and limitations on recovery ..... 48
4.11.3 Notice and payment to small customers of overcharges ..... 48
4.12 Tariff changes and options ..... 49
4.12.1 Obligations on retail entities ..... 49
4.12.2 Change of tariff within a billing cycle ..... 49
4.12.3 Customer applications* ..... 49
4.12.4 Effective date of transfer between tariffs ..... 49
4.12.5 Change in use ..... 50
4.12.6 Notification of price changes ..... 50
4.13 Payment ..... 50
4.13.1 Minimum time for payment of a bill* ..... 50
4.13.2 Issue of reminder notices ..... 50
4.13.3 Payment methods* ..... 50
4.13.4 Direct debit ..... 51
4.13.5 Other retail fees and charges ..... 51
4.13.6 Pass through of distribution non-network charges ..... 51
4.13.7 Payments in advance* ..... 52
4.13.8 Long absence or illness ..... 52
4.13.9 Concessions, rebates or grants ..... 52
4.13.10 Payment difficulties ..... 52
4.14 Paying by instalments ..... 53
4.14.1 Minimum instalment payment options* ..... 53
4.14.2 When a retail entity may require instalments in advance ..... 53
4.14.3 When a retail entity does not need to offer an instalment plan ..... 53
4.14.4 Obligations on retail entities when offering instalment plans ..... 53
4.14.5 No limitation on payment options ..... 54
4.15 Review of a bill ..... 54
4.15.1 Obligation to review a bill on request ..... 54
4.15.2 Time frame for report on request ..... 54
4.15.3 Payments during a review of a bill ..... 54
4.15.4 Customer requests for testing of meters or metering data ..... 54
4.15.5 Procedures following a review of a bill ..... 54
4.16 Shortened collection period ..... 55
4.16.1 Shortened collection period ..... 55
4.16.2 Retail entities' obligations prior to placing a small customer on a shortened collection period ..... 55
4.16.3 Notice ..... 56
4.16.4 Effect of small customer compliance with shortened collection period ..... 56
4.17 Security deposits ..... 56
4.17.1 Requirement for security deposit ..... 56
4.17.2 Amount of security deposit ..... 56
A retail entity must ensure that the amount of a security deposit for a small customer is not greater than $37.5 \%$ of the customer's estimated bills over a 12 month period, based on- ..... 56
4.17.3 Estimated monthly or quarterly bills ..... 56
4.17.4 Residential customers ..... 57
4.17.5 Business customers ..... 57
4.17.6 Interest on security deposits ..... 57
4.17.7 Obligation to return a security deposit ..... 57
4.17.8 Return of bank guarantee ..... 58
4.17.9 Identification in a retail entity's accounts ..... 58
4.17.10 Use of a security deposit ..... 58
4.17.11 No unauthorised offset for goods and services other than electricity ..... 58
4.17.12 Obligation to account ..... 58
4.17.13 Transitional provision ..... 58
4.18 Disconnection of a premises ..... 59
4.18.1 Disconnection ..... 59
4.18.2 Non-payment disconnection ..... 59
4.18.3 Limitation on disconnection of residential customers in cases of financial difficulties ..... 59
4.18.4 Obligations prior to disconnection of residential customers ..... 60
4.18.5 Circumstances when a residential customer may be disconnected ..... 60
4.18.6 No obligation to offer instalment plan ..... 61
4.18.7 Limitation on disconnection of business customers ..... 61
4.18.8 Obligations on retail entity prior to disconnection of a business customer ..... 61
4.18.9 Circumstances when a business customer may be disconnected ..... 61
4.18.10 Denying access to a meter ..... 61
4.18.11 Illegal use ..... 62
4.18.12 Security deposits ..... 62
4.18.13 Acceptable identification ..... 63
4.18.14 When a retail entity must not arrange disconnection ..... 63
4.18.15 Request for final account or disconnection ..... 64
4.19 Reconnection after disconnection ..... 64
4.19.1 Retail entity and small customer obligations ..... 64
4.20 Special needs ..... 64
4.20.1 Life support equipment ..... 64
4.20.2 Cessation of requirement for life support equipment ..... 64
4.20.3 Definition of life support equipment ..... 65
4.20.4 Language and large print needs ..... 65
4.21 Advice on the use of electricity ..... 65
4.22 Force majeure ..... 65
4.22.1 Effect of force majeure event ..... 65
4.22.2 Deemed prompt notice ..... 66
4.22.3 Situations where clause 4.22.1(a) does not apply ..... 66
4.22.4 Obligation to overcome or minimise effects of force majeure event ..... 66
4.22.5 Settlement of industrial disputes ..... 66
4.22.6 Non-exclusion ..... 66
4.22.7 Obligation to include force majeure clause in negotiated retail contracts ..... 66
CHAPTER 5: SERVICES BETWEEN DISTRIBUTION AND RETAIL ENTITIES ..... 67
5.1 Application of this Chapter ..... 67
5.2 Standard co-ordination agreement ..... 67
5.3 Network billing ..... 67
5.4 Service requests ..... 68
5.4.1 Purpose of clause 5.4 to 5.7 ..... 68
5.5 Process for initiating ..... 68
5.5.1 Authority for standard service orders ..... 68
5.5.2 Initiating standard service orders ..... 68
5.6 NMI classification ..... 68
5.6.1 NMI classification - 'LARGE’ ..... 68
5.6.2 NMI classification - 'SMALL' ..... 68
5.7 Completion of standard service order ..... 69
5.7.1 Requirement to complete standard service order ..... 69
5.7.2 Preconditions for completion ..... 69
5.7.3 Timeframes for completion ..... 70
5.7.4 Requirement to Complete Disconnection Service Order Requests ..... 74
CHAPTER 6: CUSTOMER TRANSFER AND CONSENT ..... 75
6.1 Application of this Chapter ..... 75
6.1.1 Application ..... 75
6.2 Compliance obligations ..... 75
6.2.1 Contracting customer transfer functions ..... 75
6.2.2 Compliance with MSATS procedures ..... 75
6.3 Consent ..... 75
6.3.1 Obligation to obtain consent ..... 75
6.3.2 Form and retention of consent ..... 75
6.4 NMI discovery ..... 76
6.4.1 NMI and NMI checksum ..... 76
6.4.2 NMI standing data ..... 76
6.4.3 Information must not be available though MSATS ..... 76
6.4.4 Transitional provisions ..... 76
6.5 Initiation of transfers by retail entities ..... 77
6.5.1 Proposed transfers ..... 77
6.5.2 Cancellation of transfer ..... 77
6.6 Meter read methods ..... 77
6.7 Notification of non-occurrence of transfer ..... 77
6.8 Minimalist transitioning approach ..... 78
6.8.1 Application ..... 78
6.8.2 Discovery requests under a minimalist transitioning approach ..... 78
6.8.3 NMI creation requests under a minimalist transitioning approach ..... 79
6.8.4 Request to create a NMI ..... 79
6.8.5 Population of MSATS ..... 79
CHAPTER 7: RETAIL MARKETING CONDUCT ..... 80
7.1 Application of this Chapter ..... 80
7.1.1 Application ..... 80
7.1.2 Non-application to Ergon Energy ..... 80
7.1.3 Non-application by agreement ..... 80
7.2 Compliance ..... 81
7.2.1 Compliance ..... 81
7.2.2 Statement of compliance ..... 81
7.3 General conduct standards ..... 81
7.4 Time of contact ..... 81
7.4.1 Door knocking ..... 81
7.4.2 Telephone marketing ..... 82
7.5 Marketing contacts ..... 82
7.5.1 Identification ..... 82
7.5.2 Contact details ..... 82
7.5.3 Termination of marketing contacts ..... 83
7.5.4 Marketing in person ..... 83
7.5.5 Information and details to be provided in writing where marketing is in person ..... 83
7.5.6 Marketing by telephone ..... 83
7.5.7 Marketing by electronic means ..... 84
7.5.8 Record keeping standards ..... 84
7.6 Written disclosure statement ..... 84
7.7 Consent ..... 85
7.8 Training and product knowledge ..... 86
7.9 Privacy ..... 86
CHAPTER 8: RETAIL MARKET INFORMATION ..... 87
8.1 Application of this Chapter ..... 87
8.1.1 Application ..... 87
8.1.2 Non-application to Ergon Energy ..... 87
8.2 Price fact sheets ..... 87
8.2.1 Publishing price fact sheets ..... 87
8.2.2 Form of price fact sheet ..... 87
8.2.3 Expression of price information ..... 87
8.3 Provision of information to the QCA ..... 88
8.3.1 Provision of information to the QCA ..... 88
8.4 Price comparator ..... 88
8.4.1 Development of price comparator ..... 88
8.5 Review of developments in full retail competition ..... 89
8.5.1 QCA monitoring and reporting role ..... 89
8.5.2 Retail entities to supply the number of market and non-market customers ..... 89
8.5.3 Retail entities to supply customer disconnection data ..... 89
8.5.4 Retail entities to supply customer complaint data ..... 90
8.5.5 Distribution entities to supply number of NMI premises ..... 91
8.5.6 Distribution entities to supply disconnection data ..... 91
CHAPTER 9: METERING ..... 93
9.1 Application ..... 93
9.1.1 Purpose ..... 93
9.1.2 Application of this chapter ..... 93
9.1.3 Scope ..... 93
9.1.4 Responsibility for meter provision and energy data services ..... 94
9.1.5 Background information ..... 94
9.1.6 Interpretation ..... 94
9.2 Preliminary issues ..... 94
9.2.1 Metering installation components ..... 94
9.2.2 Dispute resolution ..... 96
9.2.3 Disaster recovery ..... 97
9.2.4 Document responsibility ..... 97
9.2.5 Appendix and Schedules ..... 97
9.3 Responsibility for meter provision ..... 97
9.3.1 Application of clause 9.3 ..... 97
9.3.2 Overall responsibility requirements ..... 97
9.3.3 Metering installation components - meter provision ..... 98
9.3.4 Transitional provision for existing temporary builders' supplies ..... 99
9.3.5 Reversion of metering installation types ..... 99
9.3.6 Testing and inspection of metering equipment ..... 99
9.3.7 Installation of meter ..... 100
9.4 Responsibility for energy data services ..... 101
9.4.1 Application of clause 9.4 ..... 101
9.4.2 Metering installation components - energy data services ..... 101
9.4.3 Meter reading ..... 102
9.4.4 Validation and substitution of energy data ..... 104
9.4.5 Deleted ..... 104
9.4.6 Calculation of energy data for type 7 metering installation ..... 105
9.4.7 Data storage ..... 105
9.4.8 Information ..... 105
9.4.9 Validation of metering installation database ..... 106
9.4.10 Request for testing of the metering installation ..... 106
CHAPTER 10: GENERAL ..... 108
10.1 Definitions and interpretation ..... 108
10.1.1 Definitions ..... 108
10.1.2 Interpretation ..... 119
Schedule 1 - Deleted ..... 121
Schedule 2 - Excluded Locations ..... 122
Schedule 3 - Not used ..... 123
Schedule 4 - Maximum charges (clause 3.10) ..... 126
ANNEXURE A - Standard connection contract
ANNEXURE B - Standard retail contract
ANNEXURE C - Standard co-ordination agreement

## CHAPTER 1: THIS CODE

### 1.1 Introduction

### 1.1.1 Code objective

The objective of this Code is to promote efficient investment in, and efficient use of, electricity services for the long-term interests of Queensland customers about:
(a) price, quality, reliability and security of supply of electricity; and
(b) the reliability, safety and security of the Queensland electricity system.

### 1.1.2 Scope of the Code

The scope of this Code is to:
(a) deleted
(b) set guaranteed service levels which require a distribution entity to provide a payment to a small customer where those service levels are not met;
(c) require a distribution entity to report to the $Q C A$ on its performance against guaranteed service levels;
(d) require retail entities to comply with specified customer protection provisions;
(e) set out a framework for co-ordination of services between distribution entities and retail entities;
(f) impose obligations on retail entities and distribution entities with respect to:
(i) obtaining explicit informed consent of customers prior to customer transfers;
(ii) providing information regarding certain NMI premises, including, where relevant, the NMI and NMI checksum; and
(iii) notifying and advising customers regarding the transfer process;
(g) require retail entities to comply with retail marketing and price disclosure rules;
(h) set out the principles for the metering of electricity at certain connection points and points of supply to which the National Electricity Rules do not apply and in other specified circumstances; and
(i) state the terms for a distribution entity's standard connection contract, a retail entity's standard retail contract and the standard co-ordination agreement.

### 1.1.3 Authority

This Code is made by the Minister under section 120B of the Electricity Act.

### 1.1.4 Date of effect

Subject to section 120J(3) of the Electricity Act, this Seventeenth edition of the Code takes effect on and from 25 July 2014.

### 1.1.5 Application

(a) Each distribution entity must comply with this Code as a condition of its distribution authority.
(b) Each retail entity must comply with this Code as a condition of its retail authority.
(c) To avoid doubt, this Code does not apply to:
(i) Essential Energy in respect of non-market customers supplied under its special approval number SA01/11; and
(ii) Origin Energy Electricity Limited (ACN 071052 287) in respect of non-market customers supplied under its special approval number SA02/11

### 1.1.6 Obligation to remedy

If a distribution entity or retail entity breaches this Code, it must remedy that breach as soon as practicable.

### 1.1.7 Amendment of Code

This Code may only be amended in accordance with the procedure and consultation processes set out in the electricity legislation.

### 1.1.8 Interpretation

Words appearing like this are defined in clause 10.1.1.

### 1.1.9 Other relevant instruments

Not all aspects of a distribution entity's or retail entity's obligations are regulated by this Code. Their obligations and some aspects of their relationships with a customer are also affected by a number of instruments, including:
(a) the Electricity Act;
(b) the Electricity Regulation;
(c) the Electrical Safety Act;
(d) the Electrical Safety Regulation;
(e) the National Electricity Law;
(f) the National Electricity Rules;
(g) a distribution entity's distribution authority and a retail entity's retail authority;
(h) a distribution entity's connection contract and a retail entity's retail contract;
(i) the co-ordination agreement between a distribution entity and a retail entity;
(j) the Electricity Connection and Metering Manuals;
(k) the Metrology Procedure;
(1) the MSATS procedures; and
(m) consumer protection laws, including the Competition and Consumer Act 2010 (Cth) and the Fair Trading Act.

## CHAPTER 2: MANAGEMENT OF DISTRIBUTION BUSINESSES

### 2.1 Application of this Chapter

(a) This Chapter applies to:
(i) all distribution entities; and
(ii) in respect of clauses 2.5.5(b) and 2.5.5(c), all retail entities; and
(iii) unless otherwise specified, in relation to small and large customers.
(b) Where, in this Chapter 2, a clause refers to a small customer making a request of, agreeing with or otherwise providing information to its distribution entity, that includes the retail entity doing any of those things on the small customer's behalf.

### 2.2 This clause is intentionally left blank

### 2.3 Distribution Annual Planning Report

### 2.3.1 Distribution Annual Planning Report

(a) The requirements of clause 2.3.1(b) operate in conjunction with clause 5.13 .2 of the National Electricity Rules.
(b) A distribution entity must publish its Distribution Annual planning Report (DAPR) by 30 September each year. To avoid doubt, 30 September is the "DAPR date" for the purposes of clause 5.13.2 of the National Electricity Rules.

### 2.4 Minimum service standards

### 2.4.1 Deleted.

### 2.4.2 Deleted

### 2.4.3 Deleted

### 2.4.4 Deleted

### 2.5 Guaranteed service levels

### 2.5.1 Distribution authorities

This clause 2.5 constitutes a guaranteed service levels regime notified by the QCA for the purposes of a distribution authority.

### 2.5.2 Application

(a) Subject to paragraph (c), this clause 2.5 applies to a small customer:
(i) who is the named electricity account holder for a premises; or
(ii) if there is a card operated meter at a premises, who is the occupier of that premises.
(b) A distribution entity is required to give only one GSL payment per electricity account for each event giving rise to a GSL payment regardless of the number of account holders or premises listed on the account affected by the event.
(c) A small customer is not eligible for a GSL payment for a premises which does not have a meter.
(d) A distribution entity's obligation to give a GSL payment under clauses 2.5 .3 to 2.5.7 applies notwithstanding that a retail entity may have caused the event giving rise to the GSL payment. ${ }^{1}$

### 2.5.3 Wrongful disconnection

(a) If a distribution entity wrongfully disconnects a small customer, then that customer is eligible for a GSL payment (applying on the date of the wrongful disconnection) from the distribution entity.
(b) A distribution entity wrongfully disconnects a small customer when:
(i) it was not entitled to do so under electricity legislation or the connection contract with that customer;
(ii) it fails to comply with the procedures for disconnection required of the distribution entity under the connection contract with that customer; or
(iii) it disconnects the customer at the request of a retail entity and:
(A) the wrong premises is disconnected due to an error in the retail entity's request; or
(B) the retail entity does not give the customer a disconnection warning (where required under clause 4.18) at least five business days before the disconnection occurs. To avoid doubt, a GSL payment is not payable where a retail entity does not comply with any other disconnection procedures under clause 4.18 .

### 2.5.4 Connections

If:
(a) a small customer is entitled, and has taken all necessary steps, to have its premises connected; and
(b) that customer's premises do not require any extension of, or augmentation to, the supply network to enable the customer's premises to be connected; and
(c) a distribution entity does not connect that customer's premises on the day agreed (or subsequently agreed) with that customer,

[^0]then that small customer is eligible for a GSL payment (applying on the relevant day) from the distribution entity for each day it is late.

### 2.5.5 Customer reconnection

## (a) If:

(i) a small customer's premises has been disconnected and the customer is entitled, and has taken all necessary steps, to have the premises reconnected; and
(ii) a distribution entity does not reconnect the premises within the time required in the table below,
then that small customer is eligible for a GSL payment (applying on the relevant day) from the distribution entity for each day it is late.

## Premises in Ergon Energy's distribution area

| Premises description | Time required for reconnection |
| :--- | :--- |
| Premises supplied through $C B D$ <br> feeder / urban feeder | If the request is made by the small <br> customer to its retail entity by 12.00 pm <br> on a business day, then on the same day <br> or as otherwise agreed with the small <br> customer. <br> If the request is made by the small <br> customer to its retail entity after 12.00pm <br> on a business day, then by the next <br> business day or as otherwise agreed with <br> the small customer. <br> If the request is made by the small <br> customer to its retail entity on a non- <br> business day, then on the next business <br> day or as otherwise agreed with the small <br> customer. |
| Premises supplied through short <br> rural feeder | By the next business day after the small <br> customer's request to its retail entity or <br> as otherwise agreed with the small <br> customer. |
| Premises supplied through long rural <br> feeder / isolated feeder | Within 10 business days of the small <br> customer's request to its retail entity or <br> as otherwise agreed with the small <br> customer. |

## Premises in ENERGEX's distribution area

$\left.\begin{array}{|l|l|}\hline \text { Premises description } & \text { Time required for reconnection } \\ \hline \begin{array}{l}\text { All premises other than those in } \\ \text { excluded locations }\end{array} & \begin{array}{l}\text { If the request is made by the small } \\ \text { customer } \text { to its retail entity by } 12.00 \mathrm{pm} \\ \text { on a business day, then on the same day } \\ \text { or as otherwise agreed with the small } \\ \text { customer. }\end{array} \\ \text { If the request is made by the small } \\ \text { customer to its retail entity after } 12.00 \mathrm{pm} \\ \text { on a business day, then by the next }\end{array}\right\}$

| Premises description | Time required for reconnection |
| :--- | :--- |
|  | business day or as otherwise agreed with <br> the small customer. <br> If the request is made by the small <br> customer to its retail entity on a non- <br> business day, then on the next business <br> day or as otherwise agreed with the small <br> customer. |
| Premises in excluded locations | Within 10 business days of the small <br> customer's request to its retail entity or <br> as otherwise agreed with the small <br> customer. |

(b) When a retail entity receives a request for reconnection from a small customer who is entitled to reconnection before 12.00 pm on a business day, the retail entity must, by 1.00 pm that business day, initiate a request for reconnection of the small customer's premises in accordance with Chapter 5 of this Code.
(c) The retail entity on behalf of the small customer may request that the distribution entity reconnect the small customer sooner than is required under clause 2.5.5(a). If the small customer or its retail entity does so, the distribution entity:
(i) must use its best endeavours to reconnect the small customer in the requested timeframe; and
(ii) if the reconnection is made in the requested timeframe, may charge the relevant fee published in the distribution entity's price list.
(d) In this clause 2.5.5, a "business day" does not include a local holiday in the district where the premises is located.

### 2.5.6 Hot water supply

(a) Subject to paragraph (b), if:
(i) a small customer (or its retail entity) makes an inquiry to a distribution entity about a loss of hot water supply; and
(ii) the distribution entity fails to attend the premises within the time required in the following table,
then that small customer is eligible for a GSL payment (applying on the relevant day) from the distribution entity for each day it is late.

| Feeder type through which the small <br> customer's premises is supplied | Time required to attend |
| :--- | :--- |
| long rural feeder / isolated feeder | By the business day agreed with the <br> small customer (or its retail entity). |
| All other feeder types | Within one business day of the <br> inquiry or as otherwise agreed with <br> the small customer (or its retail <br> entity). |

(b) A distribution entity is not required to attend the premises in response to a hot water supply inquiry under paragraph (a) if the distribution entity reasonably believes the loss of hot water supply is not caused by its supply network or associated control equipment, or if the loss of hot water supply is the result of an outage on its supply network or associated control equipment.
(c) In this clause 2.5.6, a "business day" does not include a local holiday in the district where the premises is located.

### 2.5.7 Appointments

(a) This clause 2.5.7 applies to an appointment which:
(i) is made between a distribution entity and a small customer (or its retail entity) who has an existing account for the premises; and
(ii) relates to the distribution entity attending the premises for the purpose of:
(A) reading, testing, maintaining or inspecting the meter; or
(B) inspecting, altering or adding to the customer's electrical installation.
(b) This clause 2.5.7 does not apply if a small customer is eligible for a GSL payment under clauses 2.5 .4 to 2.5.6.
(c) When making an appointment, a distribution entity must specify a time or time period for the appointment. Any time period must not exceed the following:
(i) for $E N E R G E X$ - a five hour period within a day; and
(ii) for Ergon Energy - a day.
(d) A distribution entity may reschedule an appointment provided it notifies the small customer before the day scheduled for the appointment.
(e) Subject to paragraph (d), if a distribution entity makes an appointment and does not attend the premises at the specified time, or within the specified time period, then the small customer is eligible for a GSL payment (applying on the date of the appointment) from the distribution entity.

### 2.5.8 Planned interruptions

(a) Except in the case of emergencies, if a distribution entity does not give a small customer at least two business days' notice of a planned interruption to that customer's premises, then the small customer is eligible for a GSL payment (applying on the date of the planned interruption) from the distribution entity.
(b) A notice may be given by mail, letterbox drop, press advertisement or any other means which are appropriate and reasonable in the circumstances.
(c) If a notice is sent by post, a small customer is taken to have received it on the second business day after posting.

### 2.5.9 Reliability

(a) Subject to paragraph (b), a small customer is eligible for a GSL payment (applying in the relevant financial year) from its distribution entity in either of the following circumstances:
(i) for each interruption to its premises which, if connected to:
(A) a CBD feeder - lasts longer than eight hours;
(B) an urban or short rural feeder - lasts longer than 18 hours; or
(C) a long rural or isolated feeder - lasts longer than 24 hours,
("interruption duration GSL"); or
(ii) once that small customer experiences the relevant number of interruptions at its premises in a financial year as set out in the following table ("interruption frequency GSL"). Irrespective of when during a financial year that a small customer becomes eligible for a GSL payment under this interruption frequency GSL, the distribution entity is only required to assess the eligibility of a small customer to a GSL payment (including an automatic payment under clause 2.5.11(b)) after the end of that financial year.

| Distribution <br> entity | Feeder type through which <br> the small customer's <br> premises is supplied | Number of interruptions in <br> a financial year * |
| :--- | :--- | :---: |
| ENERGEX | CBD feeder | 10 |
|  | Urban feeder | 10 |
|  | Short rural feeder | 16 |
|  | Urban feeder | 13 |
|  | Short rural feeder | 21 |
|  | Long rural feeder | 21 |
|  | Isolated feeder | 21 |
|  | * A customer is not entitled to more than one GSL payment |  |
|  |  |  |

(b) The following types of interruptions are excluded from paragraph (a):
(i) an interruption of a duration of one minute or less;
(ii) an interruption resulting from:
(A) load shedding due to a shortfall in generation;
(B) a direction by $A E M O$, a system operator or any other body exercising a similar function under the Electricity Act, National Electricity Rules or National Electricity Law;
(C) automatic shedding of load under the control of underfrequency relays following the occurrence of a power system under-frequency condition described in the power system security and reliability standards;
(D) a failure of the shared transmission grid; or
(E) a direction by a police officer or another authorised person exercising powers in relation to public safety;
(iii) a planned interruption;
(iv) an interruption requested, or initiated, by the small customer;
(v) an interruption caused by the small customer's electrical installation or failure of that electrical installation;
(vi) an interruption to a small customer's premises within a region in which a natural disaster has occurred, where:
(A) the Queensland Minister for Police and Community Safety has notified the Commonwealth of the occurrence of an eligible disaster under the Natural Disaster Relief and Recovery Arrangements in respect of that natural disaster for that region; and
(B) the interruption occurred during the period for which the Natural Disaster Relief and Recovery Arrangements have been notified.

### 2.5.10 Amount of GSL payments

This table sets out the amount of a GSL payment applicable for the date or financial year in which a guaranteed service level is not met in accordance with clauses 2.5 .3 to 2.5.9.

| Electricity <br> Industry Code | GSL | GSL Payment for <br> 1 July 2010 to <br> 30 June 2015 |
| :--- | :--- | :--- |
| Clause 2.5.3 | Wrongful disconnections | $\$ 130$ |
| Clause 2.5.4 | Connection not provided by the agreed date | $\$ 52$ per day |
| Clause 2.5.5 | Reconnection not provided within the required time | $\$ 52$ per day |
| Clause 2.5.6 | Failure to attend to customer's premises within the | $\$ 52$ per day |
|  | time required concerning loss of hot water supply |  |
| Clause 2.5.7 | Failure to attend appointments on time | $\$ 52$ |
| Clause 2.5.8 | Notice of a planned interruption to supply not given | $\$ 26$ for small |
|  |  | residential customers <br> and $\$ 65$ for small |
|  |  | business customers <br> Clause 2.5.9(a)(i) |
| Interruption duration GSL | $\$ 104$ |  |
| Clause 2.5.9(a)(ii) | Interruption frequency GSL | $\$ 104$ |

### 2.5.11 Claiming a GSL payment

(a) A distribution entity must use best endeavours to automatically give a GSL payment to a small customer eligible for it under clauses 2.5.3 to 2.5.8. However, a small customer may make a claim for a GSL payment within three months of the event giving rise to the claim where a distribution entity has not done so.
(b) A distribution entity must use best endeavours to automatically give a GSL payment to a small customer eligible for it under clause 2.5.9. However, a small customer may make a claim for a GSL payment where a distribution entity has not done so:
(i) within three months of the relevant interruption for an interruption duration GSL; and
(ii) within three months of the end of the relevant financial year for an interruption frequency $G S L$.

### 2.5.12 How a GSL payment is paid

A distribution entity must use its best endeavours to pay a GSL payment to a small customer entitled to it by cheque, electronic funds transfer or any other means agreed with the small customer.

### 2.5.13 Small customers with card operated meters

(a) This clause 2.5.13 applies to small customers who have card operated meters instead of clauses 2.5.11 and 2.5.12.
(b) A small customer who becomes eligible for a GSL payment under clauses 2.5.3 to 2.5 .9 must make a claim from the distribution entity within one month of the event giving rise to the claim to be entitled to that GSL payment.
(c) To remove doubt, if there are multiple occupiers of a premises, a distribution entity is only required to give one GSL payment.
(d) A distribution entity must pay a GSL payment to a small customer entitled to it by cheque, electronic funds transfer or any other means agreed with the small customer.

### 2.5.14 Processing claims

A distribution entity must use best endeavours to process a claim for a GSL payment:
(a) within one month after receiving a claim under clauses 2.5.11(a) and 2.5.11(b)(i); and
(b) in respect of a claim for an interruption frequency GSL under clause 2.5.11(b)(ii), within one month after the end of the financial year or one month after receiving a claim, whichever is the later.

### 2.5.15 Caps on entitlements

(a) Subject to paragraph (b), a small customer is not entitled to receive more than $\$ 320$ worth of GSL payments (more than $\$ 416$ worth of GSL payments from 1 July 2010) in any one financial year per electricity account.
(b) GSL payments received by a small customer in respect of wrongful disconnection under clause 2.5.3 are not to be taken into account in determining whether that customer has reached the cap under paragraph (a).

### 2.5.16 GST

All amounts specified in this clause 2.5 include $G S T$ (if any is payable).

### 2.5.17 Effect of a GSL payment

(a) A small customer's receipt of a GSL payment does not in any way alter or diminish any rights which it may have against any person under trade practices or other applicable legislation, common law or contract.
(b) A distribution entity does not make any admission of legal liability or a breach of the Code in giving a GSL payment.
(c) A retail entity does not make any admission of legal liability or a breach of the Code when a distribution entity makes a GSL payment which is reimbursed by the retail entity under a co-ordination agreement.
(d) This clause 2.5 does not alter, vary or exclude the operation of sections 97 and 97A of the Electricity Act and sections 119 and 120 of the National Electricity Law, or any other limitations of liability or immunities granted to a distribution entity under electricity legislation.

### 2.5.18 Disputes about GSL payments involving a retail entity

(a) If a small customer has a dispute about a GSL payment relating to clauses 2.5.3 to 2.5.7, where a retail entity caused (or is claimed to have caused) the event giving rise to the GSL payment, it must be dealt in accordance with the retail entity's complaint handling process under clause 4.6.3.
(b) If the dispute is not resolved under the retail entity's complaint handling process, the small customer may refer the dispute to the Energy and Water Ombudsman Queensland.
(c) To avoid doubt, the Energy and Water Ombudsman Queensland may decide whether a GSL payment is payable or not without referring the matter to the QCA. A decision by the Energy and Water Ombudsman Queensland that a distribution entity must make a GSL payment (or that a retail entity caused the event giving rise to the GSL payment) is not evidence that the relevant entity has breached the Code.

### 2.5.19 Review of guaranteed service levels

The QCA must review the guaranteed service levels and GSL payment amounts to apply at the beginning of each regulatory control period.

### 2.6 Reporting and monitoring

### 2.6.1 Distribution entity must monitor performance

(a) A distribution entity must monitor:
(i) deleted
(ii) its compliance with the guaranteed service levels,
to enable it to provide the reports to the $Q C A$ specified in clause 2.6.2.

### 2.6.2 Reporting requirements

(a) Within two months of the end of each quarter, a distribution entity must submit a report to the QCA detailing the following for the preceding quarter and for the financial year to the end of that quarter:
(i) deleted
(ii) compliance with the guaranteed service levels, including;
(A) the number of GSL payments given by category and the amount of such payments;
(B) the number of GSL payment claims by category; and
(C) the number of rejected GSL payment claims by category; and
(iii) any other matter reasonably notified by the QCA.
(b) The distribution entity must also provide any other further reports reasonably required by the $Q C A$ in respect of guaranteed service levels from time to time.
(c) Each report must be submitted in the format determined by the $Q C A$.

## CHAPTER 3: Deleted

## CUSTOMER CONNECTION SERVICES

### 3.1 Application of this Chapter

This chapter applies to all distribution entities:
(a) in respect of clauses 3.2 and 3.3, in relation to all customers with whom a distribution entity has a standard connection contract; and
(b) in respect of clauses 3.4 to 3.9, in relation to all small customers with whom a distribution entity has a connection contract; and

### 3.2 Customer Information

### 3.2.1 Provision of information

A distribution entity must, on request by a customer or a customer's retail entity, provide information about the customer's energy consumption or the distribution entity's charges, but information requested more than once in any 12 month period may be provided subject to a reasonable charge.

### 3.2.2 Obligation to publish information

(a) A distribution entity must publish on its website:
(i) a summary of the rights and obligations of a customer under Chapter 3 of this Code and how a copy of the Code may be obtained;
(ii) a summary of the terms and conditions of the standard connection contract in Annexure A to this Code;
(iii) details of a distribution entity's service standards and any associated GSL schemes;
(iv) details of applicable energisation and re-energisation timeframes;
(v) notice of a customer's rights in respect of the negotiation of different terms;
(vi) details of charges for customer connection services;
(vii) information relation to new connections or connection alterations;
(viii) a description of the distribution entity's and customer's respective rights and obligations concerning the provision of customer connection services under this code and the Electricity Act 1994;
(ix) a summary of the rights, entitlements and obligations of small customers' including-
(a) the distribution entity's standard complaints and dispute resolution procedure; and
(b) the contact details for the Energy and Water Ombudsman Queensland.
(x) a description of how to read a meter and the process to check the reliability of a meter;
(xi) information on electrical safety, including safety switches and vegetation control;
(xii) if any overhead or underground lines are to be owned by the customer;
(xiii) a clear indication of the rules that are applied to determine the extent of the customer's responsibility in relation to those lines;
(xiv) information on the prospect of, and preventative measures to protect against, voltage fluctuations (ie. power surges, spikes, blackouts and brownouts); and
(xv) any other information reasonably required by the $Q C A$ on no less than six months' notice.
(b) If a customer requests information of the kind referred to in clause (1), the distribution entity must either:
(i) refer the customer to the distribution entity's website; or
(ii) provide the information to the customer.
(c) However, the distribution entity must provide a copy of any information of that kind to the customer if the customer requests a copy.
(d) The information or a copy of the information requested under this rule must be provided without charge, but information requested more than once in any 12 month period may be provided subject to a reasonable charge.

### 3.3 Standard connection contract

### 3.3.1 Standard connection contract

(a) For the purpose of section $40 \mathrm{DB}(3)$ of the Electricity Act, the terms of a distribution entity's standard connection contract are the terms set out in Annexure A.
(b) Where a distribution entity is a party to a standard connection contract, the distribution entity must comply with the terms of the standard connection contract.

### 3.4 Minimum terms and conditions

For the purposes of section $40 \mathrm{DE}(2)$ of the Electricity Act, clauses 3.5 to 3.8 are minimum terms for the provision of customer connection services to small customers.

### 3.5 Liability

### 3.5.1 No indemnity

A distribution entity must not include an indemnity or other term or condition in any negotiated connection contract with a small customer the effect of which is to entitle the distribution entity to recover from the customer in respect of:
(a) any breach by the customer of the contract; or
(b) any negligence by the customer in relation to the contract,
any greater amount than that which, under common law (including in equity) or statute, the distribution entity is entitled to as compensation for the customer's breach of contract or negligence.

### 3.5.2 Restrictions on distribution entities' limitation of liability in negotiated connection contracts

A distribution entity must ensure that any clause in any negotiated connection contract it enters into with a small customer limiting the liability of the distribution entity to the small customer does not provide any greater limitation of liability than that provided for in clause 6 of the standard connection contract.

### 3.6 Disconnection

### 3.6.1 Disconnection

A distribution entity is only entitled to disconnect a small customer's premises if:
(a) the small customer's retail entity informs the distribution entity that they have a right to arrange for disconnection under their retail contract with the small customer and requests that the distribution entity arrange such disconnection;
(b) the small customer refuses or fails to pay the distribution entity following a request by the distribution entity for a capital contribution towards the costs incurred, or to be incurred, by the distribution entity in extending, or increasing the capacity of, its supply network to provide the customer connection services to the premises;
(c) the small customer does not provide and maintain space, equipment, access, facilities or anything else the small customer must provide for the customer connection services under the electricity legislation or a customer connection contract;
(d) the small customer fails to give safe access as required under the electricity legislation;
(e) there are health and safety reasons;
(f) there is an emergency;
(g) required to do so at the direction of the relevant authority;
(h) the small customer provided false information to the distribution entity (in circumstances where the small customer would not have been entitled to be connected if the false information had not been provided);
(i) either the small customer does any of the following or fails to take reasonable steps to ensure others do not do any of the following:
(i) illegally uses electricity supplied to the small customer's premises;
(ii) interferes or allows interference with any of the distribution entity's equipment which is at the premises except as may be permitted by law;
(iii) uses the electricity supplied to the small customer's premises or any electrical equipment in a manner which:
(aa) unreasonably interferes with the connection or supply of electricity to another customer; or
(bb) causes damage or interference to any third party;
(iv) allows customer connection services provided by the distribution entity to be used other than in accordance with the connection contract or the electricity legislation; or
(j) the small customer tampers with, or permits tampering with, any meters or associated equipment;
(k) the distribution entity is billing the small customer directly and the small customer fails to pay a bill by a due date;
(1) the distribution entity is entitled to require a security deposit from the small customer and upon request, the small customer does not provide a security deposit;
(m) the distribution entity is otherwise entitled under the electricity legislation to disconnect the small customer.

### 3.6.2 Disconnection procedures

(a) The distribution entity may only disconnect the premises under clauses 3.6.1(b) , 3.6.1(c), 3.6.1(d), 3.6.1(h), 3.6.1(1), if:
(i) the distribution entity has sent the small customer a disconnection warning that:
(A) states the date it is issued;
(B) requires the small customer to rectify, in not fewer than five business days after issue of the disconnection warning, the issue that could lead to disconnection; and
(C) carries a warning of the consequences of failing to comply with the disconnection warning; and
(ii) the small customer fails to comply with the disconnection warning in not fewer than five business days after its receipt.
(b) The distribution entity may only disconnect the premises under clause 3.6.1(k) if:
(i) the distribution entity has sent the small customer a reminder notice that:
(A) states the date it was issued;
(B) requires the small customer to rectify, in not fewer than five business days after issue of the reminder notice, the failure to pay; and
(C) carries a warning of the consequences of failing to comply with the reminder notice;
(ii) the distribution entity has sent the small customer a disconnection warning upon the small customer failing to comply with the reminder notice; and
(iii) the small customer fails to comply with the disconnection warning not fewer than five business days after it receipt; and
(iv) the amount due is not less than the amount approved by the $Q C A$.
(c) A distribution entity must include on a disconnection warning given to a small customer details of the existence and operation of the Energy and Water Ombudsman Queensland, including the Energy and Water Ombudsman Queensland's contact details.

### 3.6.3 Limitations on disconnection

(a) A distribution entity must not disconnect a small customer's premises under clauses 3.6.1(a), 3.6.1(b), 3.6.1(c), 3.6.1(d), 3.6.1(h), 3.6.1(k) and 3.6.1(l):
(i) before 8 am and after 3 pm on a business day;
(ii) on a Friday or the day before a public holiday;
(iii) on a weekend or a public holiday; or
(iv) between 20 December and 31 December (inclusive) in any year.
(b) To avoid doubt, paragraph (a) does not apply if the small customer has requested the disconnection.
(c) In this clause 3.6.3, public holiday means a Queensland wide public holiday and a local holiday in the district where the premises is located.

### 3.7 Small customer's liability for connection services

(a) A small customer is not liable to pay the distribution entity for providing customer connection services to the small customer's premises under a
negotiated connection contract with the distribution entity for the period following:
(i) disconnection of the premises;
(ii) subject to paragraph (b), the end of the notice period set out in clause 4.4.5 commencing on the small customer or the small customer's retail entity notifying the distribution entity orally or in writing that customer connection services are no longer needed at the premises; or
(iii) electricity is supplied to the premises by arrangement with another customer or under a different connection contract with the small customer.
(b) If the small customer gives notice under clause 3.7(a)(ii) but does not, if required by the distribution entity, give the distribution entity safe access to the premises for a final meter reading, the small customer is liable for customer connection services provided at the premises until the earlier of the following:
(i) the end of the notice period commencing on safe access being given to the distribution entity for a final meter reading;
(ii) the end of the day the distribution entity reads the meter.
(c) The standard connection contract sets out a small customer's liability if the small customer is on a standard connection contract.

### 3.8 Billing

(a) Subject to paragraph (b), a negotiated connection contract with a small customer must include an obligation on the distribution entity to bill the small customer for network charges through the small customer's retail entity and not directly.
(b) Paragraph (a) will not apply to a distribution entity where the distribution entity has agreed in writing with a small customer, by obtaining that small customer's explicit informed consent, that the distribution entity may bill the small customer directly, if the customer:
(i) is a business customer;
(ii) has one or more relevant premises or a group of premises;
(iii) is a small customer in respect of one or more of those premises; and
(iv) the aggregate of the annual electricity consumption level for those premises equals or exceeds 100 MWh of electricity per annum.

### 3.9 Differing terms and requirements

### 3.9.1 Differing terms and requirements

Nothing in this Code prevents:
(a) a distribution entity requiring different small customers on negotiated connection contracts to pay differing security;
(b) a distribution entity requiring different small customers to pay different capital contributions prior to entering into or during the term of a connection contract;
(c) a distribution entity using differing methods of charging for the provision of customer connection services to different small customers on connection contracts; and
(d) subject to clause 3.4, a distribution entity providing customer connection services on different terms to different small customers or types of small customers on negotiated connection contracts.

## CHAPTER 4: CUSTOMER RETAIL SERVICES

## Preamble

How does Chapter 4 apply?

|  | Market customer | Non-market customer |
| :---: | :---: | :---: |
| large customers | * Chapter 4 does not apply. | * Chapter 4 does not apply. These customers should refer to their retail entity's "standard large customer retail contract" available from their retail entity (including its website) or from the QCA. |
| small customers | $\checkmark$ Chapter 4 applies. The terms and conditions of a negotiated retail contract with a small customer must be consistent with the minimum terms set out in Chapter 4. The terms marked * in Chapter 4 may be varied for this category of customers with the customer's explicit informed consent. | Chapter 4 applies. These customers are on the standard retail contract in Annexure B. |

### 4.1 Application of this Chapter

### 4.1.1 Application of this Chapter

(a) This chapter applies to:
(i) all retail entities;
(ii) in respect of clause 4.2.10(b), all distribution entities; and
(iii) subject to paragraph (b), in relation to retail contracts with all small customers; and
(iv) in respect of clauses 4.12 .6 and 4.12.7, negotiated retail contracts with all small customers made before or after the date this Code takes effect.
(b) Chapter 4, or specified provisions of Chapter 4, will not apply to a retail entity where the retail entity has agreed in writing with a customer, by obtaining that customer's explicit informed consent in a negotiated retail contract, that Chapter 4, or specified provisions of Chapter 4, will not apply in respect of a contract for customer retail services, if:
(i) the customer:
(A) is a business customer;
(B) has one or more relevant premises or a group of premises;
(C) is a small customer in respect of one or more of those premises; and
(ii) the aggregate of the actual or estimated annual energy consumption level for those premises equals or exceeds:
(A) in the case of an electricity only contract, 100 MWh of electricity per annum; or
(B) in the case of a dual fuel contract, 100 MWh of electricity per annum or 1 TJ of gas per annum.

### 4.2 Retail contracts

### 4.2.1 Terms of standard retail contract

(a) The contract set out in Annexure B to this Code applies to a small customer that does not have a negotiated retail contract with its retail entity.
(b) For the purpose of the Electricity Act, the terms of a retail entity's standard retail contract are the terms set out in Annexure B to this Code.
(c) If a small customer negotiates a contract with its retail entity then that contract must not be inconsistent with the terms of Chapter 4 of this Code.

### 4.2.2 Notice of contract where no application made

A retail entity must, as soon as practicable after becoming aware that a small customer is a move-in customer, advise that small customer of:
(a) the terms and conditions of the standard retail contract, including access to notified prices;
(b) the existence and a general description of the retail entity's negotiated retail contracts, if any; and
(c) the ability of the small customer to choose a retail entity from whom it wishes to purchase customer retail services.

### 4.2.3 Minimum terms and conditions for negotiated retail contracts

(a) Subject to paragraph (d), the provisions of Chapter 4 which are not permitted to be varied under this clause 4.2 .3 are the minimum terms for the provision of customer retail services to small customers for the purposes of section $55 \mathrm{C}(2)$ of the Electricity Act.
(b) The terms and conditions of a negotiated retail contract with a small customer must not be inconsistent with such provisions and are unenforceable to the extent they are.
(c) At the request of a retail entity the $Q C A$ may at its absolute discretion, prior to the commencement of a negotiated retail contract, approve terms and conditions for that negotiated retail contract which do not conform with all or any of the provisions of Chapter 4 of this Code.
(d) For the purposes of paragraph (a), the following clauses of Chapter 4 (marked with an asterisk (*) and an annotation throughout) may be varied in a negotiated retail contract:
(i) Clause 4.9.1 (obligation to bill quarterly);
(ii) Clause 4.9.6(r) (list of available payment methods on bill);
(iii) Clause 4.9.6(s) (notice of customer's right to nominate apportionment being on bill);
(iv) Clause 4.12.3 (customer applications for alternative tariffs or tariff options);
(v) Clause 4.13 .1 (minimum time for payment of a bill);
(vi) Clause 4.13 .3 (minimum payment methods offered);
(vii) Clause 4.13 .7 (acceptance of payments in advance); and
(viii) Clause 4.14.1 (minimum instalment payment options).

### 4.2.4 Cooling-off

(a) A retail entity must ensure that each negotiated retail contract it enters into with a small customer confers on the small customer the right to rescind that negotiated retail contract in accordance with this clause within the period of 10 business days commencing on, and including, the date of receipt by the small customer of the disclosure statement provided in respect of that negotiated retail contract.
(b) A right of rescission conferred under this clause may be exercised notwithstanding affirmation of the contract by the small customer.
(c) Notice of rescission must be provided to the retail entity by the small customer in a form which clearly indicates an intention on the part of the small customer to rescind the negotiated retail contract.
(d) A notice of rescission provided in writing by a small customer will be deemed to have been received by the retail entity on the date it was sent where the notice was sent by:
(i) post to the retail entity's postal address as stated in the disclosure statement provided in respect of the negotiated retail contract;
(ii) facsimile to the retail entity's facsimile number as stated in the disclosure statement provided in respect of the negotiated retail contract; or
(iii) email to the retail entity's email address as stated in the disclosure statement provided in respect of the negotiated retail contract.
(e) Nothing in this clause affects other rights in law or in equity which a small customer may have in relation to the negotiated retail contract or the conduct of a retail entity.
(f) A retail entity must include in each negotiated retail contract it enters into with a small customer express provisions setting out the rights and obligations provided for by this clause 4.2.4.
(g) A retail entity must retain records of a notice of rescission given by a small customer under clause (c) for a period of two years and in a format which permits the retail entity to answer any enquiries relating to that notice by the small customer, the QCA, the Energy and Water Ombudsman Queensland or any other entity permitted by electricity legislation to access that information.

### 4.2.5 Compliance with applicable regulatory instruments

A retail entity must ensure that when a negotiated retail contract it enters into with a small customer confers an obligation on the small customer to comply with all relevant requirements imposed by electricity legislation, that negotiated retail contract must also confer on the retail entity a contractual obligation to comply with all relevant requirements imposed by electricity legislation.

### 4.2.6 Commencement of financial responsibility under negotiated retail contracts

The obligation under a negotiated retail contract for a retail entity to provide customer retail services, and for a small customer to pay for such services, does not become binding between the retail entity and the small customer until and unless:
(a) the retail entity becomes the financially responsible retail entity for the premises; and
(b) any cooling-off period applicable to the negotiated retail contract has expired.

### 4.2.7 Laws of Queensland to govern negotiated retail contracts

A retail entity must ensure that each negotiated retail contract it enters into with a small customer is governed by the laws of Queensland.

### 4.2.8 No indemnity

A retail entity must ensure that any negotiated retail contract it enters into with a small customer does not include an indemnity or other term and condition the effect of which is to entitle the retail entity to recover from the small customer in respect of:
(a) any breach by the small customer of the contract; or
(b) any negligence by the small customer in relation to the contract,
any greater amount than that which, under common law (including in equity) or statute, the retail entity is entitled to as compensation for the small customer's breach of contract or negligence.

### 4.2.9 Restrictions on retail entities' limitation of liability in negotiated retail contracts

A retail entity must ensure that any clause in any negotiated retail contract it enters into with a small customer limiting the liability of the retail entity to the small customer does not provide any greater limitation of liability than that provided for in clause 7 of the standard retail contract.
4.2.10 Identifying who is obliged to offer a standard retail contract
(a) If a retail entity is contacted by a small customer for a premises and the retail entity does not offer the small customer a negotiated retail contract on request, the retail entity must:
(i) if the retail entity is not the financially responsible retail entity for the premises:
(A) refer the small customer to the distribution entity for the premises; and
(B) inform the small customer that the distribution entity will be able to advise the customer which retail entity has the obligation to provide customer retail services to the small customer on the terms of the standard retail contract at notified prices; or
(ii) if the retail entity is the financially responsible retail entity for the premises, advise the small customer that it has an obligation to provide customer retail services to the small customer on the terms of the standard retail contract at notified prices.
(b) If a distribution entity is contacted by a small customer directly or on referral from a retail entity seeking the information referred to under paragraph (a), the distribution entity must:
(i) where the small customer is a move-in customer or is seeking to connect the premises to the supply network, inform the small customer:
(A) that associated service order requests must be made through a retail entity;
(B) that the small customer may be able to choose their retail entity and may benefit from exercising this choice;
(C) that a list of retail entities who are offering small customers negotiated retail contracts can be obtained from the $Q C A$ or the $Q C A$ ' $s$ website; and
(D) if requested, the retail entity who has the obligation to provide customer retail services to the small customer on the terms of the standard retail contract at notified prices; or
(ii) in all other circumstances, inform the small customer of the retail entity who has the obligation to provide customer retail services to the small customer on the terms of the standard retail contract at notified prices.

### 4.3 Commencement of standard retail contracts

### 4.3.1 Commencement of standard retail contracts

A standard retail contract commences on the provision of customer retail services to a small customer by the retail entity in accordance with the Electricity Act.

### 4.4 Ending of retail contracts

### 4.4.1 When a standard retail contract ends

(a) A standard retail contract ends on the earliest of the following to occur:
(i) subject to paragraph (c), the end of the notice period set out in clause 4.4.5 after the small customer notifies the retail entity (a "termination notice") that it wishes the provision of customer retail services to the small customer at the premises to be terminated (even if the small customer has vacated the premises earlier);
(ii) a date agreed between the retail entity and the small customer;
(iii) when the provision of customer retail services to the premises commences under a negotiated retail contract between the retail entity and the small customer;
(iv) when a small customer becomes a large customer with respect to the premises;
(v) when the provision of customer retail services to the premises commences under a retail contract with a different customer;
(vi) a different retail entity has become the financially responsible retail entity for the premises; or
(vii) the small customer's premises is disconnected and the small customer no longer has a right to be reconnected under clause 4.19.
(b) Where a small customer gives a termination notice and notifies the retail entity of a date on which the small customer intends to vacate the premises, the retail entity must:
(i) use its best endeavours to ensure that the relevant meters are read, or the relevant metering data are obtained, at that premises on the date and at the time agreed with the small customer (or as soon as possible after that date if the small customer has not provided access to the relevant meters on the date or at that time); and
(ii) prepare and send to the small customer at the forwarding address provided by the small customer a final bill based on the relevant metering data.
(c) If the small customer gives a termination notice but does not give safe access to the premises to conduct a final meter reading (where relevant), then the standard retail contract will not end under subparagraph (a)(i) until the earlier of:
(i) the end of the notice period commencing on safe access being given; or
(ii) when the meter is read or the relevant metering data are obtained.

### 4.4.2 Term of a negotiated retail contract

(a) Subject to paragraph (c), a retail entity must ensure that each negotiated retail contract it enters into with a small customer confers on the small customer the right to effect:
(i) an in-situ termination ${ }^{2}$ of that contract by providing at least 20 business days' notice; and
(ii) termination of that contract by giving a notice where the small customer is vacating the premises (a "vacation notice"). The vacation notice must be given in advance of the vacation. The period of advance notice must be at least the required notice period set out in clause 4.4.5.
(b) Where a small customer gives a vacation notice and notifies the retail entity of the date on which the small customer intends to vacate the premises the retail entity must:
(i) use its best endeavours to ensure that the relevant meters are read, or the relevant metering data are obtained, at that premises on the date and at the time agreed with the small customer (or as soon as possible after that date if the small customer has not provided access to the relevant meters on the date or at that time); and
(ii) prepare and send to the small customer at the forwarding address provided by the small customer a final bill based on the relevant metering data.
(c) If the small customer gives a vacation notice but does not give safe access to the premises to conduct a final meter reading (where relevant), then the negotiated retail contract will not end until the earlier of:
(i) the end of the notice period commencing on safe access being given;
(ii) when the meter is read or the relevant metering data are obtained;
(iii) when the provision of customer retail services to the premises commences under a retail contract with a different customer; or
(iv) a different retail entity has become the financially responsible retail entity for the premises.
(d) If the small customer has entered into a fixed-term contract with the retail entity and has terminated that contract prior to the expiry of the fixed-term in accordance with paragraph (a), the retail entity may only impose an early termination charge if:
(i) the negotiated retail contract includes details of the amount or manner of calculation of the early termination charge;

[^1](ii) the early termination charge is a reasonable estimate of the costs to the retail entity resulting from the early termination; and
(iii) the imposition of the early termination charge is not prohibited under the electricity legislation or in law or in equity.

### 4.4.3 Termination of retail contracts by retail entities

A retail entity may not terminate a retail contract with a small customer by reason of the small customer's breach of the retail contract unless and until whichever is the earliest of the following events occurs:
(a) the small customer's premises has been disconnected in accordance with the terms of the retail contract and the small customer no longer has a right to be reconnected under clause 4.19 of this Code;
(b) the small customer and the retail entity have entered into a new retail contract in respect of the premises; or
(c) a different retail entity has become the financially responsible retail entity for the premises.

### 4.4.4 Expiry of fixed-term contracts

No earlier than 40 business days and at least 20 business days prior to the expiry of a fixed-term contract, a retail entity must advise a small customer of the:
(a) date on which the fixed-term contract will expire;
(b) terms and conditions for the provision of customer retail services to the small customer by the retail entity which will come into effect after the expiry date if the small customer does not elect before that date to enter into a new retail contract with the retail entity or another retail entity for the small customer's premises;
(c) existence of the other contractual options that may be available for the purchase of customer retail services by that small customer at that premises and a general description of each; and
(d) ability of the small customer to choose the retail entity from whom it wishes to purchase customer retail services.

### 4.4.5 Notice period

For the purposes of clause 4.4, the notice period for a retail contract is dependent on who the small customer's distribution entity is and the location or feeder type of the premises to which the retail contract relates. The tables below sets out the relevant notice periods:

## Premises in ENERGEX's distribution area

| Premises description | Notice period |
| :--- | :--- |
| All premises other than excluded <br> locations | $5^{3}$ business days |
| Premises in excluded locations | 10 business days |

## Premises in Ergon Energy's distribution area

| Premises description | Notice period |
| :--- | :--- |
| Premises supplied through CBD <br> feeder/ urban feeder / short rural <br> feeder | 5 business days |
| Premises supplied through long <br> rural feeder / isolated feeder | 10 business days |

In this clause 4.4.5, a "business day" does not include a local holiday in the district where the premises is located.

### 4.4.6 Transitional notice period

Until the end of 30 June 2008, the relevant notice period for the purposes of clause 4.4 for all premises in ENERGEX's distribution area, other than premises in excluded locations, is six business days.

### 4.4.7 Expiry of fixed-term benefits

No earlier than 40 business days and at least 20 business days prior to the expiry of a fixed benefit period, a retail entity must advise a small customer of the:
(a) date on which the fixed benefit period will expire;
(b) existence of the other contractual options that may be available for the purchase of customer retail services by that small customer at that premises and a general description of each;
(c) ability of the small customer to choose the retail entity from whom it wishes to purchase customer retail services; and
(d) termination fees and other fees (if any) that will apply if the customer decides to end the contract.

### 4.5 Customer Information

### 4.5.1 Obligation to prepare Customer Information

(a) Each retail entity must publish on its website a summary of the rights, entitlements and obligations of small customers, including-
(i) the retail entity's standard complaints and dispute resolution procedure; and
(ii) the contact details for the Energy and Water Ombudsman Queensland.
(b) If a small customer requests information of the kind referred to in subparagraph (a), the retail entity must either-
(i) refer the customer to the retail entity's website; or
(ii) provide the information to the customer.
(c) The retail entity must provide a copy of any information of that kind to the customer if the customer requests a copy.
(d) The information or a copy of the information requested under this clause must be provided without charge, but information requested more than once in any 12 month period may be provided subject to a reasonable charge.

### 4.6 Dealing with small customers

### 4.6.1 Retail entities to prepare enquiry procedures

A retail entity must, within 20 business days after it first provides customer retail services to a small customer after the FRC commencement date, prepare and submit to the $Q C A$, for approval, its procedures for handling small customer enquiries. The procedures must deal with at least the following matters:
(a) the establishment of a customer enquiry line (for the cost of a local call from anywhere in Queensland) or information desk to provide information about:
(i) the provision of customer retail services to small customers;
(ii) the referral of questions by small customers concerning the quality, reliability and safety of electricity supply to their premises to the small customer's distribution entity;
(iii) payment options available to small customers;
(iv) what small customers can do if they are having trouble paying the retail entity's bills;
(v) how small customers can make enquiries or lodge complaints; and
(vi) the existence and operations of the Energy and Water Ombudsman Queensland;
(b) the registration of special needs (see clause 4.20);
(c) referral to interpreter services; and
(d) any other matter required by the $Q C A$.

### 4.6.2 Approval and implementation of enquiry procedures

The $Q C A$ must notify the retail entity whether it approves the enquiry procedures. If the $Q C A$ notifies the retail entity that it does not approve the enquiry procedures, the retail entity must submit revised procedures as soon as practicable until a set of procedures is approved. The retail entity must implement the procedures within 20 business days after the date they are approved by the $Q C A$.

### 4.6.3 Complaint handling

(a) If there is a dispute between the small customer and the retail entity about the terms of a retail contract or any rights or obligations under this Code, the small customer may complain to the retail entity.
(b) The retail entity must handle a complaint made by a small customer in accordance with the Australian Standard.
(c) When the retail entity responds to a small customer's complaint, the retail entity must inform the small customer:
(i) that the retail entity is obliged to handle a complaint made by a small customer in accordance with the retail entity's standard complaints and dispute resolution procedures, which can be found on the retail entity's website or provided to the customer on request;
(ii) the retail entity must inform the small customer of the outcome of the customer's complaint; that the small customer has a right to raise the complaint to a higher level within the retail entity's management structure; and
(iii) that, if after raising the complaint to a higher level the small customer is still not satisfied with the retail entity's response, the small customer can refer the complaint to the Energy and Water Ombudsman Queensland.
(d) If requested by the small customer, the information in paragraph (c) must be provided in writing.

### 4.6.4 Customer communications

(a) Notices and bills are deemed to have been received by a party to a retail contract:
(i) on the date the retail entity hands it to the small customer, it is left at the small customer's premises or successfully faxed to the small customer (which occurs when the sender receives a transmission report to that effect);
(ii) on the date two business days after it is posted to a premises or a small customer's contact address; or
(iii) where use of email has been agreed, on the date of transmission unless the sender receives notice that delivery did not occur or has been delayed.

### 4.7 Applications and connections

### 4.7.1 Retail entities' requirements

If a small customer wishes to purchase customer retail services from a retail entity at a premises under a retail contract, the retail entity may require that the small customer must first apply to the retail entity (in person, by telephone or in writing) to provide customer retail services to that small customer at that premises and, if requested by the retail entity:
(a) provide acceptable identification when required by the retail entity;
(b) provide credit history information when required by the retail entity;
(c) pay any relevant fees and charges applicable to that small customer;
(d) provide contact details for billing purposes;
(e) provide contact details for the owner (or the agent of the owner) of the premises if the application is for a rental property;
(f) ensure that there is safe and convenient access to the meter at the premises;
(g) where appropriate, provide estimated electricity load information for the small customer's proposed use of electricity at the premises;
(h) (subject to clause 4.17) provide a security deposit, a bank guarantee or enter into a payment arrangement; and
(i) satisfy any other pre-condition set out in the electricity legislation.

### 4.7.2 Retail entities' requirements when a small customer moves in without first making an application for services

If a small customer is a move-in customer, the retail entity may require that the small customer:
(a) make an application to the retail entity for the provision of customer retail services; and
(b) comply with the requirements set out in clause 4.7.1(a) to (k).

### 4.7.3 Use of credit history information where a small customer seeks a standard retail contract

(a) Nothing in clause 4.7 .1 will permit a financially responsible retail entity to refuse to enter into a standard retail contract with a small customer on the basis of credit history information.
(b) Subject to clauses 4.17.4 and 4.17.5, where a small customer enters into a standard retail contract, credit history information may only be used by the financially responsible retail entity in determining whether to require the payment of a security deposit by the small customer.

### 4.7.4 Retail entities' obligations to advise the distribution entity of connection applications

Subject to the small customer complying with clause 4.7.1, as soon as possible after receiving an application from a small customer to start providing customer retail services to the small customer, or a request from a small customer to arrange for connection, a retail entity must forward relevant details of a small customer, including their classification as a small business customer or small residential customer to the small customer's distribution entity for the purpose of:
(a) updating the distribution entity's records for that premises and small customer, if the small customer's premises is already connected; or
(b) arranging for the connection of that premises, if the small customer's premises is not already connected to the distribution entity's supply network.

### 4.8 Illegal use

### 4.8.1 Retail entities' rights of recovery for illegal use

The restrictions on recovery of undercharged amounts in clause 4.11.2 do not apply if a small customer has been undercharged or not charged as a result of a small customer's or an occupier of the premises' fraud or intentional consumption of electricity otherwise than in accordance with the electricity legislation.

### 4.8.2 Non-application of payment difficulties

Clause 4.13.10 does not apply if, during the course of the small customer's dealings with the retail entity, the small customer is convicted of an offence involving fraud or theft of electricity.

### 4.9 Billing

### 4.9.1 Obligation to bill quarterly*

(Note: this clause 4.9.1 may be varied in a negotiated retail contract)
(a) A retail entity must use its best endeavours to issue a bill to a small customer at least quarterly.
(b) Nothing in paragraph (a) will prevent a retail entity from issuing a bill more frequently than quarterly to a business customer.
(c) Nothing in paragraph (a) will prevent a retail entity from issuing a bill more frequently than quarterly to a residential customer where the retail entity has obtained a residential customer's explicit informed consent to issue bills on that basis.
(d) This clause 4.9.1 does not apply to small customers with card operated meters.

### 4.9.2 How bills are issued

The retail entity must issue a bill to a small customer at the premises, unless the small customer nominates another address.

### 4.9.3 Information on charges which comprise a bill

If requested by a small customer who is party to a negotiated retail contract, in relation to a bill, a retail entity must provide the small customer with reasonable information on network charges (to the extent it is readily available), retail charges and any other charges relating to the sale or sale and supply of electricity comprising the amount payable in respect of the small customer's bill.

### 4.9.4 Simultaneous payments for gas and electricity

Where a retail entity and a small customer have entered into:
(a) a dual fuel contract; or
(b) two negotiated retail contracts for the sale of electricity and the sale and supply of gas,
under which a single bill is, or two simultaneous bills are, for electricity and gas, issued to the small customer, and the small customer does not pay the entire amount owing under that bill or those bills, the retail entity must (subject to the Community
Ambulance Cover Act 2003 (Qld)):
(c) apply a payment received from a small customer for charges for the sale of electricity or the sale and supply of gas respectively as agreed between the retail entity and the small customer; or
(d) if no agreement is in place between the retail entity and the small customer, apply a payment received from a small customer for charges for the sale of electricity or the sale and supply of gas respectively as directed by the small customer; or
(e) if paragraphs (c) and (d) do not apply, apply the payment in proportion to the relative value of each of the charges.

### 4.9.5 Other goods and services to a small customer

Where a retail entity also provides goods or services (other than customer retail services) to a small customer, the retail entity must bill for those goods or services separately or:
(a) include the charges for those goods and services as separate items in its combined bills, together with a description of the other goods or services supplied;
(b) subject to the Community Ambulance Cover Act 2003 (Qld), apply any payment received from a small customer as directed by the small customer; and
(c) subject to the Community Ambulance Cover Act 2003 (Qld), where a small customer does not direct how the payment is to be applied, the retail entity must apply the payment in satisfaction of the charges for the provision of customer
retail services and the supply and sale of gas before applying any portion of it to the charges for any other goods or services.

### 4.9.6 Particulars on each bill

A retail entity must include at least the following particulars on each bill:
(a) the date of the last meter reading (or reading of metering data, as the case may be) or estimate and the number of days since the previous reading or estimate;
(b) the estimated date of the next meter reading;
(c) the meter readings, metering data or estimates for the bill;
(d) consumption, or estimated consumption, in units used (kWh or kVAh);
(e) the relevant fees, charges and tariffs applicable to the small customer;
(f) the pay-by date;
(g) the telephone number for billing, payment enquiries and instalment payment options (for the cost of a local call from anywhere in Queensland);
(h) a 24 hour contact telephone number for faults, emergencies and force majeure events;
(i) the small customer's premises and any relevant other address;
(j) the small customer's name and account number;
(k) the amount of arrears or credit;
(l) the amount of any security deposit provided by the small customer;
(m) the amount of any other charge (as described in clause 4.9.5) and details of the goods or service provided;
(n) on residential customers' bills only, advice in languages common to the residential customer base on how to access interpreter services;
(o) on residential customers' bills only, a reference to the availability of concessions, if any;
(p) if the bill is a reminder notice issued in accordance with clause 4.13.2, contact details for the retail entity's internal complaint handling processes;
(q) all NMI and NMI checksum applicable to the bill;
(r) a list of the available payment methods;* and
(paragraph (r) may only be varied in a negotiated retail contract where clause 4.13.3 is also varied)
(s) if the bill contains charges for the sale of both electricity and gas, a notice advising of the small customer's right to nominate apportionment of any payment between those charges under clause 4.9.4.*
(Paragraph (s)(s) may only be varied where clause 4.9.4(c) applies.)

### 4.9.7 Average daily usage

(a) Subject to paragraph (b), a retail entity must, for a small customer's current premises, display on each bill the small customer's current average daily usage and, to the extent that data are available, a comparison of the small customer's average daily usage for the same period during the previous year for that premises.
(b) A retail entity need not include a comparison of average daily usage:
(i) when it is the small customer's first bill for a premises;
(ii) where there has been no or very low relevant electricity consumption; or
(iii) where relevant comparable data are not available.

### 4.9.8 Historical billing data

(a) A retail entity must keep a small customer's billing data for a minimum of two years.
(b) Where a small customer requests, and the data are available, a retail entity must promptly provide to the small customer free of charge the small customer's billing data appearing on the small customer's bills for a premises for the previous two years.
(c) Where the small customer requests billing data before this period, the retail entity must use its best endeavours to provide that data to the small customer and may impose a reasonable charge for providing that data. ${ }^{4}$

### 4.9.9 Bill format

A retail entity must issue a bill in a format which permits a small customer to easily verify that the bill conforms with its retail contract.

### 4.10 Meter reading

### 4.10.1 Meter reading for billing purposes

A retail entity must:
(a) base a small customer's bill on:
(i) the meter reading or metering data for the relevant meters at the small customer's premises provided by the responsible person determined in accordance with Chapter 9 of this Code or the Metrology Procedure (as appropriate); or

[^2](ii) any method agreed between the small customer and the retail entity, which may include a customer self read;
(b) use its best endeavours to ensure that an actual meter reading is obtained at least once every 12 months; and
(c) use an estimate of the amount of electricity consumed at the small customer's premises only if an actual meter reading is not obtained from the premises for the billing period under consideration.

### 4.10.2 Advice that a bill is estimated

If a retail entity issues a small customer with a bill that is not based on an actual meter reading, or is based on a substituted meter reading, it must publish a notice in a prominent location on that bill advising that the bill is based on an estimate.

### 4.10.3 Adjustments to subsequent bills

Where a retail entity has issued a small customer with a bill based on an estimate and the retail entity subsequently issues the small customer with a bill that is based on an actual meter reading:
(a) the retail entity must include an adjustment on the bill to take account of any overcharging of the small customer that has occurred; and
(b) unless the actual meter reading could not be obtained as a result of an act or omission by the small customer, the retail entity will, at the request of the small customer, offer the small customer time to pay the undercharged amount by agreed instalments (which is not an instalment plan), over a period being no longer than:
(i) the period during which an actual meter reading was not obtained, where this period is less than 12 months; or
(ii) in any other case, 12 months.

### 4.10.4 Pass through of cost where access is denied

Where a small customer has denied access to a meter for the purpose of reading that meter and subsequently requests the retail entity to replace an estimated bill with a bill based on an actual meter reading, the retail entity must use its best endeavours to comply with that request but may pass through to that small customer any costs it incurs in doing so.

### 4.10.5 Unmetered supplies

If there is no meter in respect of a small customer's premises, a retail entity must base a bill on the provisions relating to unmetered premises in the notified prices. Where the notified prices do not apply, the retail entity must base a bill on metering data calculated in accordance with the Metrology Procedure or Chapter 9 of this Code (as appropriate).

### 4.11 Undercharging and overcharging

### 4.11.1 Recovery of undercharges from small customers

Subject to clause 4.11.2, where a retail entity has undercharged a small customer it may recover from the small customer the amount undercharged.

### 4.11.2 Process and limitations on recovery

Where a retail entity proposes to recover an amount undercharged the retail entity must:
(a) if the amount was undercharged as a result of the retail entity's or distribution entity's act or omission, limit the amount to be recovered to the amount undercharged in the 9 months prior to the date the small customer is notified of the undercharging;
(b) list the amount to be recovered as a separate item in a special bill or in the next bill, together with an explanation of that amount;
(c) not charge the small customer interest on that amount; and
(d) offer the small customer time to pay that amount by agreed instalments, over a period nominated by the small customer being no longer than:
(i) the period during which the undercharging occurred (if the undercharging occurred over a period of less than 12 months); or
(ii) in any other case, 12 months.

### 4.11.3 Notice and payment to small customers of overcharges

(a) Subject to paragraph (b), where a small customer has been overcharged, the retail entity must inform the small customer accordingly within 10 business days of the retail entity becoming aware of that overcharging and:
(i) if the small customer has already paid that amount, credit that amount to the small customer's next bill unless the small customer reasonably requests otherwise in which case the retail entity must comply with that request; or
(ii) if the small customer has ceased to purchase customer retail services from that retail entity, use its best endeavours to pay that amount to the small customer within 10 business days.
(b) If the small customer has been overcharged otherwise than as a result of an act or omission of the retail entity or distribution entity, the retail entity is only required to credit or pay the small customer the amount the small customer was overcharged in the 12 months before the error was discovered.
(c) No interest shall accrue to a credit or refund referred to in paragraph (a) or (b).

### 4.12 Tariff changes and options

### 4.12.1 Obligations on retail entities

Subject to clauses 4.12 .6 and 4.12 .7 where during a billing cycle a small customer changes from one type of tariff to another type of tariff for customer retail services, the retail entity must (if it is necessary to do so due to the change in the type of tariff applying to that small customer):
(a) obtain a meter reading (or metering data) at the time the type of tariff changes; and
(b) calculate the small customer's bill using the type of tariff applying:
(i) the old type of tariff up to but not including the date of the meter reading; and
(ii) the new type of tariff from and including the date of the meter reading.

### 4.12.2 Change of tariff within a billing cycle

Subject to clauses 4.12 .6 and 4.12 .7 where during a billing cycle the tariff rate or charge applying to a small customer changes, the retail entity must calculate the bill on a pro rata basis using:
(a) the old tariff rate or charge up to but not including the date of change; and
(b) the new tariff rate or charge from and including the date of the change to the end of the billing cycle.

### 4.12.3 Customer applications*

(Note: this clause 4.12.3 may be varied in a negotiated retail contract)
Where a retail entity offers alternative tariffs or tariff options and a small customer:
(a) requests that the retail entity transfer from that small customer's current tariff to another tariff; and
(b) demonstrates to the retail entity that it satisfies all of the conditions relating to that other tariff and any conditions imposed by the small customer's distribution entity,
the retail entity must transfer the small customer to that other tariff within 10 business days of satisfying those conditions.

### 4.12.4 Effective date of transfer between tariffs

Where a small customer transfers from one tariff type to another in accordance with clause 4.12.3, the effective date of the transfer will be:
(a) subject to paragraph (b), the date on which the meter reading referred to in clause 4.12.1(a) was obtained; or
(b) where the transfer requires a change to the meter at the small customer's premises, the date the meter change is completed.

### 4.12.5 Change in use

(a) Where a small customer notifies a retail entity of a change in use of the small customer's premises, the retail entity may require the small customer to transfer to a tariff applicable to the small customer's use of that premises.
(b) If a small customer fails to give the notice required under paragraph (a), the retail entity may, upon written notice to the small customer, transfer the small customer retrospectively to the applicable tariff.

### 4.12.6 Notification of price changes

(a) A retail entity must set out in a negotiated retail contract with a small customer all tariffs and charges payable by the customer.
(b) The retail entity must give notice to the customer of any variation to the tariffs and charges that affects the customer.
(c) The notice must be given as soon as practicable, and in any event no later than the customer's next bill.
(d) The retail entity must set out in the negotiated retail contract the obligations with regard to notice that the retail entity must comply with where the tariffs and charges are to be varied.

### 4.13 Payment

### 4.13.1 Minimum time for payment of a bill*

(Note: clause 4.13.1 may be varied in a negotiated retail contract)
Unless otherwise agreed with a small customer, the pay-by date specified in the bill must not be less than 13 business days after the date the retail entity sends the bill.

### 4.13.2 Issue of reminder notices

If a small customer has not paid a bill by the pay-by date, the retail entity may send to that small customer a reminder notice that its bill is past due, giving the small customer a further pay-by date (not less than five business days after the date the notice is sent).

### 4.13.3 Payment methods*

(Note: this clause may be varied in a negotiated retail contract)
A retail entity must offer at least the following payment methods to its small customers:
(a) in person at a network of agencies or payment outlets;
(b) by mail; and
(c) by direct debit under a payment arrangement agreed by the small customer, the retail entity and a bank nominated by the small customer.

### 4.13.4 Direct debit

(a) Where a direct debit arrangement is to be entered into between a retail entity and a small customer:
(i) the retail entity and the small customer must agree the amount, initial date and frequency of the direct debits; and
(ii) the explicit informed consent of the small customer is required for entering into the arrangement.
(b) Where a direct debit arrangement is entered into between a retail entity and a small customer, the retail entity must
(i) notify the small customer in writing that if the customer requests the retailer to cease to rely on the arrangement, the retail entity will no longer rely on the direct debit authority; and
(ii) terminate the arrangement on being requested by the customer to do so.

### 4.13.5 Other retail fees and charges

(a) In addition to charges for electricity consumption, a retail entity may impose other fees and charges on a small customer relating to the provision of customer retail services:
(i) under a negotiated retail contract, whether or not the imposition of that fee or charge is expressly provided for in this Code; and
(ii) under a standard retail contract, only where the imposition of that fee or charge is expressly provided for in the notified prices.
(b) In a negotiated retail contract, the amount of any such fee or charge must be fair and reasonable having regard to related costs incurred by the retail entity.

### 4.13.6 Pass through of distribution non-network charges

(a) A retail entity may bill a small customer under a retail contract a distribution non-network charge which:
(i) the distribution entity is entitled to charge the small customer under their connection contract; and
(ii) has been charged to the retail entity in accordance with the coordination agreement between the retail entity and the distribution entity.

Examples of distribution non-network charges are disconnection fees, reconnection fees and meter test fees.
(b) If a small customer is on a standard retail contract, a retail entity must not charge the small customer any administration fees or surcharge with respect to distribution non-network charges.

### 4.13.7 Payments in advance*

(Note: this clause 4.13 .7 may be varied in a negotiated retail contract)
(a) A retail entity must, at the request of a small customer, accept payment in advance.
(b) The acceptance of an advance payment by a retail entity in accordance with paragraph (a) will not require the retail entity to credit any interest to the amounts paid in advance.

### 4.13.8 Long absence or illness

Where a residential customer is unable to arrange payment by one of the methods specified in clause 4.13.3, whether due to illness or long absence, the retail entity must offer:
(a) payment in advance facilities (unless a negotiated retail contract between the small customer and retail entity has varied clause 4.13.7); and
(b) redirection of the small customer's bill as requested by the small customer free of charge.

### 4.13.9 Concessions, rebates or grants

The retail entity must, when requested by a residential customer, pass on to the residential customer, as soon as is reasonably practicable, any information about the availability of concessions, rebates or grants (in particular, the electricity pensioners' and seniors' rebate), which information has been provided to the retail entity by the organisation or Government department responsible for the administration of that concession, rebate or grant.

### 4.13.10 Payment difficulties

(a) Where a residential customer informs the retail entity in writing or by telephone that the customer is experiencing payment difficulties, or the retail entity's credit management processes indicate or ought to indicate to the retail entity that a residential customer is experiencing payment difficulties, the retail entity must offer the residential customer, as soon as is reasonably practicable, an instalment plan which complies with clause 4.14 and, where appropriate:
(i) information about the right to have a bill redirected to a third person, as long as that third person consents in writing to that redirection;
(ii) information on independent financial and other relevant counselling services;
(iii) advise the residential customer of any concessions, rebates or grants that may be available to the residential customer to assist with financial hardship; and
(iv) to the extent available, advice on how a residential customer may arrange for an electricity audit of the residential customer's premises.
(b) Where a residential customer requests information or a redirection of its bills under this clause, the retail entity must provide that information or redirection free of charge.

### 4.14 Paying by instalments

### 4.14.1 Minimum instalment payment options*

(Note: this clause 4.14.1 may be varied in a negotiated retail contract)
A retail entity must offer residential customers at least the following payment options:
(a) a system or arrangement under which a residential customer may make payments in advance towards future bills; and
(b) an interest and fee free instalment plan under which the residential customer is given more time to pay a bill or to pay arrears (including any disconnection or reconnection charges).

### 4.14.2 When a retail entity may require instalments in advance

A retail entity may require a residential customer to pay by instalments in advance if the residential customer is in arrears or as an alternative to the residential customer paying a security deposit.

### 4.14.3 When a retail entity does not need to offer an instalment plan

A retail entity does not have to offer a residential customer an instalment plan if the residential customer has, in the previous 12 months, had two instalment plans cancelled due to non-payment. In such a case, the retail entity must offer another instalment plan only if the retail entity is reasonably satisfied that the residential customer will comply with that instalment plan.

### 4.14.4 Obligations on retail entities when offering instalment plans

A retail entity offering an instalment plan must:
(a) in determining the period of the plan and calculating the amount of the instalments, take into account information from the residential customer about the residential customer's usage needs and capacity to pay;
(b) specify the period of the plan;
(c) specify the number of instalments (not less than four, unless the residential customer agrees otherwise);
(d) specify the amount of the instalments which will pay the residential customer's arrears (if any) and estimated usage during the period of the plan;
(e) state how the amount of the instalments is calculated;
(f) state that due to seasonal fluctuations in the residential customer's usage, paying by instalments may result in the residential customer being in credit or debit during the period of the plan;
(g) monitor the residential customer's compliance with that plan; and
(h) have in place fair and reasonable procedures to address payment difficulties a residential customer may face while on the plan.

### 4.14.5 No limitation on payment options

Nothing in this Code limits the payment options that a retail entity may offer to a small customer.

### 4.15 Review of a bill

### 4.15.1 Obligation to review a bill on request

A retail entity must review a small customer's bill when asked by that small customer.

### 4.15.2 Time frame for report on request

The retail entity must inform the small customer of the outcome of that review as soon as reasonably possible but, in any event, within 20 business days.

### 4.15.3 Payments during a review of a bill

Where a retail entity is reviewing a bill, the retail entity may require the small customer to pay:
(a) the greater of:
(i) that portion of the bill under review that the small customer and the retail entity agree is not the subject of review; or
(ii) an amount equal to the average amount of the small customer's bills in the previous 12 months (excluding the bill in dispute); and
(b) any future bills that are properly due.

### 4.15.4 Customer requests for testing of meters or metering data

(a) Where the small customer requests that, in reviewing the bill, the meter reading or metering data be checked or the meter tested, the retail entity must, as the case may be:
(i) arrange for a check of the meter reading or metering data; or
(ii) request the small customer's responsible person to test the meter.
(b) The small customer must pay any distribution non-network charge levied by the distribution entity for testing the meter. The fee may be requested in advance.

### 4.15.5 Procedures following a review of a bill

Where, after conducting a review of the bill, a retail entity is satisfied that it is:
(a) correct, the retail entity may require the small customer to pay the amount of that bill which is still outstanding; or
(b) incorrect, the retail entity:
(i) must correct the small customer's bill in accordance with clause 4.11;
(ii) must refund (or set off against the amount in (iii)) any fee paid in advance under clause 4.15.4;
(iii) may require the small customer to pay the amount of that bill which is still outstanding; and
(iv) must advise the small customer of the existence of its complaint handling processes under clause 4.6 .3 of this Code.

### 4.16 Shortened collection period

### 4.16.1 Shortened collection period

Where a retail entity has issued a small customer with:
(a) reminder notices in respect of two consecutive electricity bills; or
(b) reminder notices in respect of three consecutive dual fuel contract bills; or
(c) two consecutive disconnection warnings,
the retail entity may place the small customer on a shortened collection period in relation to the relevant retail contract.

### 4.16.2 Retail entities' obligations prior to placing a small customer on a shortened collection period

Before a retail entity may place a small customer on a shortened collection period, the retail entity must inform the small customer by notice that:
(a) receipt of a second reminder notice (or second disconnection warning) may result in the small customer being placed on a shortened collection period;
(b) being placed on a shortened collection period will result in the small customer not receiving a reminder notice until the small customer has paid three consecutive bills by the pay-by date;
(c) the small customer may obtain further information from the retail entity on a specified telephone number;
(d) once on a shortened collection period, the small customer must pay three consecutive bills by the pay-by date to return to its previous collection period; and
(e) in the case of a residential customer only, alternative payment arrangements, such as instalment plans offered by the retail entity, are available.

### 4.16.3 Notice

(a) Where after giving notice as required in clause 4.16 .2 , a retail entity decides to shorten the collection period in respect of a small customer, the retail entity must give the small customer written notice of that decision within 10 business days of the decision.
(b) Any notice given under paragraph (a) must advise the small customer of the existence of the retail entity's complaint handling processes available under clause 4.6.3 of this Code.

### 4.16.4 Effect of small customer compliance with shortened collection period

Where a small customer on a shortened collection period pays three consecutive bills by the pay-by date, the retail entity must return the small customer to the collection period that applied before the shortened collection period commenced.

### 4.17 Security deposits

### 4.17.1 Requirement for security deposit

(a) A retail entity may require a small customer to provide a security deposit at the time the small customer makes an application under clause 4.7 (or an application for reconnection after being disconnected by reason of clause 4.18), or before providing customer retail services to the small customer.
(b) A small customer must provide the security deposit, any increase in the security deposit or, if the retail entity permits a bank guarantee to be provided in place of a security deposit, the bank guarantee, within five business days after the retail entity requests such security deposit, increase or bank guarantee when requested by the retail entity.

### 4.17.2 Amount of security deposit

A retail entity must ensure that the amount of a security deposit for a small customer is not greater than $37.5 \%$ of the customer's estimated bills over a 12 month period, based on-
(a) the customer's billing history; or
(b) the average usage of energy by a comparable customer over a comparable 12 month period.

### 4.17.3 Estimated monthly or quarterly bills

For the purposes of clause 4.17.2, a retail entity must base a customer's estimated monthly or quarterly bill on:
(a) the customer's previous billing history;
(b) the previous billing history at the premises; or
(c) typical electricity usage of customers of the same type as the customer.

### 4.17.4 Residential customers

A retail entity must not require a residential customer to provide a security deposit unless:
(a) the residential customer has left a previous premises without settling an outstanding electricity debt owing to that retail entity, the debt remains outstanding, and the residential customer refuses to make arrangements (acceptable to both parties) to pay the debt;
(b) the residential customer has within the previous two years fraudulently acquired or intentionally consumed electricity otherwise than in accordance with electricity legislation;
(c) the residential customer is a new customer and has refused or failed to produce acceptable identification;
(d) the residential customer has not provided credit history information required by the retail entity; or
(e) the retail entity has reasonably formed a view that the residential customer has an unsatisfactory or no credit history.

### 4.17.5 Business customers

(a) A retail entity must not require a business customer to provide a security deposit unless:
(i) the business customer does not have a satisfactory credit rating; or
(ii) the business customer does not have a satisfactory electricity account payment history.
(b) A retail entity must accept a bank guarantee from a small business customer as an alternative to a cash security deposit.
(c) Despite clause 4.17.1, a retail entity may increase a small business customer's existing security deposit at any time to ensure the security deposit held is sufficient to secure that business customer's current electricity usage taking into account the limits on security deposits under clause 4.17.2 as calculated using the average of the business customer's last three bills.

### 4.17.6 Interest on security deposits

Where a retail entity has received a security deposit from a small customer, the retail entity must pay interest, if any, to the small customer, on the deposit at the contract interest rate.

### 4.17.7 Obligation to return a security deposit

(a) Where a small customer has been required by a retail entity to pay a security deposit, the retail entity must repay to the small customer in accordance with the small customer's reasonable instructions the amount of the security deposit, together with accrued interest, within 10 business days of the small customer:
(i) completing one year's payment (in the case of a residential customer) or two years' payment (in the case of a business customer) by the payby dates on the retail entity's initial bills; or
(ii) ceasing to take supply at the relevant premises.
(b) If no reasonable instructions are given by the small customer, a retail entity must credit the amount of the security deposit, together with accrued interest, on the small customer's next bill.

### 4.17.8 Return of bank guarantee

Where a retail entity has accepted a bank guarantee from a business customer in lieu of a security deposit, the retail entity must return the bank guarantee within 10 business days to the business customer in the circumstances set out in clause 4.17.7.

### 4.17.9 Identification in a retail entity's accounts

A retail entity must keep security deposits in a separate account and separately identify in its company accounts, at all times, the value of security deposits which it holds for small customers.

### 4.17.10 Use of a security deposit

Despite clause 4.17.7, a retail entity may, subject to clause 4.17.11, use a small customer's security deposit and interest which has accrued to it to offset any amount owed by that small customer to the retail entity:
(a) if the small customer fails to pay a bill resulting in disconnection of the premises; or
(b) in relation to a final bill issued by the retail entity when the small customer vacates a premises or ceases to purchase customer retail services from the retail entity at that premises or asks that the premises be disconnected.

### 4.17.11 No unauthorised offset for goods and services other than electricity

The retail entity must not, without the small customer's explicit informed consent, use a small customer's security deposit to offset charges in respect of any goods or services (other than customer retail services) provided by the retail entity.

### 4.17.12 Obligation to account

The retail entity must account to the small customer for any use of the security deposit (and pay the balance, if any, to the small customer) within 10 business days.

### 4.17.13 Transitional provision

A retail entity is not required to return any security deposits (or any amount which is in excess of that permitted under clause 4.17 .2 ) collected prior to the FRC commencement date until the earlier of:
(a) the date the customer qualifies under clause 4.17.7(a) for its return based on:
(i) the one year period commencing on the FRC commencement date if the customer is a residential customer; or
(ii) the two year period commencing on the FRC commencement date if the customer is a business customer; and
(b) the date the small customer would have qualified for its return under section 4.17.8 of the Code as it applied immediately prior to the FRC commencement date.

### 4.18 Disconnection of a premises

### 4.18.1 Disconnection

A retail entity must not arrange to disconnect a small customer's premises except in accordance with this clause 4.18.

### 4.18.2 Non-payment disconnection

Subject to clauses 4.18 .3 to 4.18 .9 , a retail entity may arrange to disconnect a small customer's premises in accordance with this clause 4.18 if a small customer has not paid a bill and has not:
(a) agreed to an offer (made in accordance with clauses 4.13.10 and 4.14) of an instalment plan or other payment option to pay a bill; or
(b) adhered to the small customer's obligations to make payments in accordance with an agreed instalment plan or other payment option relating to the payment of bills.

### 4.18.3 Limitation on disconnection of residential customers in cases of financial difficulties

Where, because of a lack of sufficient income on the part of a residential customer and any other person normally resident at the customer's premises, the residential customer is unable to pay a bill, the retail entity must not arrange for disconnection of the residential customer's premises except where the retail entity has, in addition to complying with the requirements of clauses 4.18.4 and 4.18.5:
(a) used its best endeavours to contact the residential customer either:
(i) by telephone;
(ii) by mail;
(iii) by lettergram;
(iv) by facsimile;
(v) by email; or
(vi) by any other method approved by the regulator from time to time;
(b) given the residential customer information on government funded concessions, rebates or grants as outlined in clause 4.13.9, if applicable, and referred the residential customer to the organisation responsible for that concession; and
(c) offered the residential customer alternative payment options of the kind referred to in clauses 4.13 and 4.14.

### 4.18.4 Obligations prior to disconnection of residential customers

Subject to clause 4.16, before the retail entity arranges for disconnection of any residential customer the retail entity must have:
(a) given the residential customer a reminder notice;
(b) after the expiry of the period referred to in the reminder notice, given the residential customer a written disconnection warning that states the date it was issued and that allows not less than five business days' notice of its intention to arrange for the disconnection (the five business days shall be counted from the date of issue of the disconnection warning); and
(c) included details of the existence and operation of the Energy and Water Ombudsman Queensland, including the Energy and Water Ombudsman Queensland's contact details, on the disconnection warning.

### 4.18.5 Circumstances when a residential customer may be disconnected

(a) Provided the retail entity has complied with clause 4.18.4, the retail entity may arrange for disconnection of the residential customer:
(i) if the retail entity was required to make an offer under clause 4.18.3(c), immediately if the residential customer:
(A) has refused or failed to accept the offer before the expiry of the period in the disconnection warning; or
(B) has accepted the offer, but has refused or failed to take any reasonable action towards settling the debt before the expiry of the period in the disconnection warning; and
(ii) in all other circumstances, immediately after the expiry of the five business days period in the disconnection warning, if the customer has not rectified the situation that gave rise to the right to arrange for the disconnection of the small customer's premises.
(b) Where the retail entity and the residential customer have entered into a dual fuel contract, or two negotiated retail contracts for the sale of electricity and the sale and supply of gas, under which a single bill, or two simultaneous bills, for electricity and gas are, issued to the residential customer, the retail entity may:
(i) arrange for the disconnection of the residential customer's gas supply in accordance with the duel fuel contract; and
(ii) only arrange for disconnection of the residential customer's electricity supply 15 business days after disconnecting the residential customer's
gas supply if the residential customer has refused or failed to take any reasonable action towards settling the debt since the date of disconnection of the residential customer's gas supply under subparagraph (i).

### 4.18.6 No obligation to offer instalment plan

A retail entity is not obliged to offer an instalment plan as provided in clause 4.14 where the residential customer has in the previous twelve months had two instalment plans cancelled due to non payment.

### 4.18.7 Limitation on disconnection of business customers

A retail entity must not arrange for the disconnection of a business customer's premises for failure to pay an account except in accordance with clauses 4.18.8 and 4.18.9.

### 4.18.8 Obligations on retail entity prior to disconnection of a business customer

Subject to clause 4.16, before the retail entity arranges for disconnection of any small business customer the retail entity must have:
(a) if requested, offered the business customer an extension of time to pay on terms and conditions;
(b) given the business customer a reminder notice;
(c) after the expiry of the period referred to in the reminder notice, given the business customer a written disconnection warning, with five business days' notice of its intention to arrange for the disconnection (the five business days shall be counted from the date of issue of the disconnection warning); and
(d) included details of the existence and operation of the Energy and Water Ombudsman Queensland, including the Energy and Water Ombudsman Queensland's contact details, on the disconnection warning.

### 4.18.9 Circumstances when a business customer may be disconnected

Provided the retail entity has complied with clause 4.18.8, the retail entity may arrange for the disconnection of the business customer immediately if the business customer:
(a) has failed to request or refused or failed to accept the offer which the business customer could request under 4.18.8(a) before the expiry of the five business days period in the disconnection warning; or
(b) has accepted the offer which the business customer could request under 4.18.8(a), but has refused or failed to take any reasonable action towards settling the debt before the expiry of the five business days period in the disconnection warning.

### 4.18.10 Denying access to a meter

(a) Where a small customer fails to allow, for three consecutive scheduled meter readings, access to the small customer's premises to read a meter, the retail entity may arrange for the disconnection of the small customer's premises.
(b) A retail entity must not exercise its right to arrange for disconnection under paragraph (a) unless the retail entity has:
(i) given the small customer an opportunity to offer reasonable alternative access arrangements that are acceptable to the responsible person;
(ii) on each of the occasions access was denied, arranged for the small customer to be given written notice requesting access to the meter or meters at the premises and advising of the retail entity's ability to arrange for disconnection under this clause 4.18.10;
(iii) used its best endeavours to contact the small customer either:
(A) by telephone;
(B) by mail;
(C) by lettergram;
(D) by facsimile;
(E) by email; or
(F) by any other method approved by the $Q C A$ from time to time;
(iv) given the small customer a written disconnection warning with five business days' notice of its intention to arrange for the disconnection (the five business days shall be counted from the date of receipt of the disconnection warning); and
(v) included details of the existence and operation of the Energy and Water Ombudsman, including the Energy and Water Ombudsman Queensland's contact details, on the disconnection warning.

### 4.18.11 Illegal use

Notwithstanding any of the requirements in this clause 4.18, excepting the provisions of clause 4.18.14(a)(ii), a retail entity may arrange for the disconnection of a small customer's premises immediately where the small customer has fraudulently acquired or intentionally consumed electricity otherwise than in accordance with the electricity legislation.

### 4.18.12 Security deposits

(a) A retail entity may arrange for the disconnection of a small customer's premises where the small customer refuses to pay a security deposit or provide a bank guarantee in accordance with clause 4.17.
(b) A retail entity must not exercise its right to disconnect under paragraph (a) unless the retail entity has given the small customer not less than five business days' written notice of its intention to arrange for the disconnection (the five business days shall be counted from the date of receipt of the notice).

### 4.18.13 Acceptable identification

(a) A retail entity may arrange for the disconnection of a small customer's premises where the small customer refuses to or fails to provide acceptable identification when requested by the retail entity.
(b) A retail entity must not exercise its right to arrange for disconnection under paragraph (a) until the retail entity has:
(i) given the small customer a written notice; and
(ii) after the expiry of the period referred to in the reminder notice, not being less than five business days after it is sent, given the residential customer a written disconnection warning with five business days' notice of its intention to arrange for the disconnection (the five business days shall be counted from the date of recept of the disconnection warning).

### 4.18.14 When a retail entity must not arrange disconnection

(a) Despite any other provisions of this clause 4.18, a retail entity must not arrange for the disconnection of a small customer's premises:
(i) for non-payment of a bill where the amount outstanding is less than an amount approved by the QCA and the small customer has agreed with the retail entity to repay that amount;
(ii) where the small customer or a person residing at the small customer's premises has advised the retail entity that a person ordinarily residing at the premises is dependent on life support equipment in accordance with the provisions of clause 4.20 ;
(iii) where a small customer has made a complaint, directly related to the reason for the proposed disconnection, to the Energy and Water Ombudsman Queensland or another external dispute resolution body and the complaint remains unresolved;
(iv) where the small customer has formally applied for assistance from the agencies referred to in clause 4.13.9, and a decision on the application has not been made;
(v) where the small customer has failed to pay an amount on a bill which relates to the charges listed in clause 4.9.5;
(vi) before 8.00 am or after 3.00 pm on a business day;
(vii) on a Friday, on a weekend, on a public holiday or on the day before a public holiday; or
(viii) between 20 December and 31 December (inclusive) in any year,
except where requested by a small customer.
(b) In this clause 4.18.14, public holiday means a Queensland wide public holiday and a local holiday in the district where the premises is located.

### 4.18.15 Request for final account or disconnection

If a small customer requests the retail entity to arrange for the preparation and issue of a final bill for, or the disconnection of, the small customer's premises, the retail entity must use its best endeavours to arrange for that bill or disconnection in accordance with the small customer's request.

### 4.19 Reconnection after disconnection

### 4.19.1 Retail entity and small customer obligations

Where a retail entity has arranged for the disconnection of a small customer's premises and the small customer has within 10 business days of the disconnection:
(a) if relevant, rectified the matter that led to the disconnection;
(b) made a request for reconnection; and
(c) paid any distribution non-network charge levied by the distribution entity for reconnection, ${ }^{5}$
the retail entity must, in accordance with clause $2.5 .5(\mathrm{~b})$, initiate a request for reconnection with respect to the small customer's premises in accordance with Chapter 5 of this Code.
(Clause 2.5 .5 sets out the maximum timeframes in which reconnection of a small customer's premises must occur if the small customer is entitled to reconnection.)

### 4.20 Special needs

### 4.20.1 Life support equipment

Where a small customer provides a retail entity with confirmation from a registered medical practitioner or a hospital that a person residing at the small customer's premises requires life support equipment, the retail entity must:
(a) register the premises as having life support equipment and give to the distribution entity relevant information about the premises for the purposes of updating the distribution entity's records and registers;
(b) not arrange for the disconnection of that premises while the person continues to reside at that premises and requires the use of life support equipment; and
(c) give the small customer an emergency telephone contact number for the small customer's distribution entity.

### 4.20.2 Cessation of requirement for life support equipment

A small customer whose premises has been registered under this clause must inform the retail entity if the person for whom the life support equipment is required vacates the premises or no longer requires the life support equipment.

[^3]
### 4.20.3 Definition of life support equipment

For the purposes of this Code, "life support equipment" means:
(a) an oxygen concentrator;
(b) an intermittent peritoneal dialysis machine;
(c) a kidney dialysis machine;
(d) chronic positive airways pressure respirators;
(e) crigler najjar syndrome photo therapy equipment;
(f) a ventilator for life support; or
(g) in relation to a particular customer-any other equipment that a registered medical practitioner certifies is required for a person residing at the customer's premises for life support.

### 4.20.4 Language and large print needs

A retail entity must:
(a) provide referral to multi-lingual services (for languages common to the relevant residential customer base) to meet the reasonable needs of its residential customers; and
(b) provide, on request by a residential customer, large print versions of:
(i) Chapter 4 of this Code, at a reasonable charge; and
(ii) the retail entity's Customer Charter, free of charge.

### 4.21 Advice on the use of electricity

A retail entity must provide to a residential customer on request and free of charge:
(a) general advice on how a residential customer may reduce its electricity costs;
(b) to the extent available, advice on how, from whom, and at what estimated cost, a residential customer may arrange for an electricity audit of the residential customer's premises; and
(c) advice on the typical running costs of major domestic appliances.

### 4.22 Force majeure

### 4.22.1 Effect of force majeure event

If, but for this clause 4.22 , a retail entity or a small customer would breach their retail contract due to the occurrence of a force majeure event:
(a) the obligations of the retail entity or the small customer, other than an obligation to pay money, under their retail contract are suspended to the extent
to which they are affected by the force majeure event for so long as the force majeure event or its effects continue; and
(b) the retail entity or the small customer must use its best endeavours to give the other prompt notice of that fact including full particulars of the force majeure event, an estimate of its likely duration, the obligations affected by it and the extent of its effects on those obligations and the steps taken to remove, overcome or minimise those effects.

### 4.22.2 Deemed prompt notice

For the purposes of clause 4.22.1, if the effects of a force majeure event are widespread the retail entity will be deemed to have given a small customer prompt notice if it makes the necessary information available by way of a 24 hour telephone service within 30 minutes of being advised of the force majeure event or otherwise as soon as practicable.

### 4.22.3 Situations where clause 4.22.1(a) does not apply

A retail entity may agree with a small customer that the retail entity is not to have the benefit of clause 4.22.1(a) in respect of any force majeure event.

### 4.22.4 Obligation to overcome or minimise effects of force majeure event

A retail entity or a small customer relying on clause 4.22.1(a) by claiming a force majeure event must use its best endeavours to remove, overcome or minimize the effects of that force majeure event as quickly as practicable.

### 4.22.5 Settlement of industrial disputes

Nothing in clause 4.22 .4 requires a retail entity or a small customer to settle an industrial dispute which constitutes a force majeure event in any manner other than the manner preferred by that retail entity or a small customer.

### 4.22.6 Non-exclusion

Nothing in this clause 4.22 varies or excludes the operation of sections 119 and 120 of the National Electricity Law or sections 97 and 97A of the Electricity Act.

### 4.22.7 Obligation to include force majeure clause in negotiated retail contracts

A retail entity must ensure that each negotiated retail contract it enters into expressly confers on the retail entity and the small customer the rights and obligations provided for in this clause 4.22, except as provided in clause 4.22.3.

## CHAPTER 5: SERVICES BETWEEN DISTRIBUTION AND RETAIL ENTITIES

### 5.1 Application of this Chapter

This chapter applies to:
(a) all distribution entities; and
(b) all retail entities.

### 5.2 Standard co-ordination agreement

For the purposes of section 55I of the Electricity Act, the terms of the standard co-ordination agreement are the terms set out in Annexure C to this Code.

### 5.3 Network billing

(a) The distribution entities will be responsible for the development of standardised B2B Procedures for network billing in Queensland, and the amendment of those $B 2 B$ Procedures for network billing as required from time to time.
(b) The B2B Procedures for network billing in Queensland will be based upon the equivalent B2B Procedures in New South Wales, varied as required to account for jurisdictional differences and operational efficiencies not otherwise accounted for in the New South Wales B2B Procedures.
(c) The distribution entities will be responsible for the establishment of a consultative forum at which retail entities and other interested parties can participate in the development of B2B Procedures for network billing.
(d) Distribution entities and retail entities must act in a cooperative and timely manner and do all such things as are reasonably necessary to establish, maintain and operate systems, processes and procedures that are compatible and compliant with the B2B Procedures for network billing established under clause 5.3(a).
(e) Nothing in clause 5.3(a) prevents a distribution entity and retail entity agreeing to vary the B2B Procedures for network billing as it applies between those parties.
(f) In the event that a network billing specification is approved by the Information Exchange Committee (or its successor), the distribution entities and retail entities agree that, from the date the national network billing specification becomes effective:
(i) the B2B procedure for network billing in Queensland established under clause 5.3(a) will cease to apply; and
(ii) the national network billing specification will apply.

### 5.4 Service requests

### 5.4.1 Purpose of clause 5.4 to 5.7

(a) The requirements of clauses 5.4 to 5.7 operate in conjunction with the National Electricity Rules and the B2B Procedures (service order process) which form part of the B2B Procedures under the National Electricity Rules.
(b) The purpose of clauses 5.4 to 5.7 are to identify the obligations and timeframes required to support the initiation and completion of standard service orders from a retail entity to a distribution entity relating to supply to a customer's premises.

### 5.5 Process for initiating

### 5.5.1 Authority for standard service orders

A distribution entity must not carry out a standard service order in relation to a customer's premises unless:
(a) a request to do so is made by:
(i) a customer's current retail entity, prospective retail entity or former retail entity, as permitted by the B2B Procedures (service order process); or
(ii) a customer, if the customer is a wholesale market customer in the wholesale market;
(b) there is a relevant emergency; or
(c) the activity is otherwise expressly authorised or required by the electricity legislation.

### 5.5.2 Initiating standard service orders

Unless otherwise agreed between the retail entity and distribution entity, a retail entity may only initiate a request of the distribution entity to undertake a standard service order by raising a service order request with the distribution entity.

### 5.6 NMI classification

### 5.6.1 NMI classification - 'LARGE'

Where a NMI for a connection point that is the subject of a service order request has a NMI classification code of 'LARGE', the service order request will be carried out by the distribution entity in accordance with the timeframes agreed between the parties.

### 5.6.2 NMI classification - 'SMALL'

Where a NMI for a connection point that is the subject of a service order request has a NMI classification code of 'SMALL', the service order request will be carried out by the distribution entity in accordance with the timeframes specified in clause 5.7.

### 5.7 Completion of standard service order

### 5.7.1 Requirement to complete standard service order

(a) Except as otherwise stated in clause 5.7, a distribution entity must complete each type of standard service order:
(i) on the date agreed (or subsequently agreed) with the retail entity or retail entity on behalf of the customer (as appropriate); or
(ii) where no date is agreed, within the period specified in clause 5.7.3.
(b) If a service order request relates to a new connection, a distribution entity must complete the standard service order:
(i) on the date agreed (or subsequently agreed) with the customer, the customer's electrical contractor on behalf of the customer, or with the retail entity on behalf of the customer; or
(ii) where no date is agreed and the customer does not require any extension of, or augmentation to, the supply network to enable the premises to be connected, then within the period specified in clause 5.7.3.
(c) If a service order request relates to a new connection where the distribution entity deals directly with the customer or the customer's electrical contractor on behalf of the customer, the distribution entity must use its best endeavours to immediately notify the customer's retail entity of any change in circumstance likely to impact completion of the standard service order or the fee associated with the standard service order, providing such information as the retail entity may reasonably request.

### 5.7.2 Preconditions for completion

(a) The timeframes for completion of a standard service order will commence on the later of:
(i) satisfaction by the customer or the retail entity (as appropriate) of all preconditions required under electricity legislation; and
(ii) receipt by the distribution entity of all relevant documentation, including a valid service order request.
(b) Once all preconditions have been satisfied and all relevant documentation has been received, the distribution entity must carry out the standard service order in accordance with the requirements of this Chapter, the B2B Procedures (service order process) and the electricity legislation.
(c) Where a distribution entity is not obliged to comply with its obligations under clause 5.7.2(a) by virtue of a failure by the customer or the retail entity to satisfy all preconditions, the distribution entity must comply with such obligations as soon as practicable after the satisfaction, removal or elimination of the reason for which the standard service order was not commenced.

### 5.7.3 Timeframes for completion

(a) The following timeframes for completion apply to each type of standard service order for the respective distribution entities and feeder type.
(b) In this clause 5.7.3, a "business day" does not include a local holiday in the district where the premises is located.
(c) Unless the small customer has requested to be disconnected, for the purposes of this clause 5.7.3, where the relevant customer is a small customer and the standard service order is "disconnection", a "business day" does not include a day between 20 December and 31 December (inclusive) in any year.
(d) If the timeframe for completion of a standard service order for "disconnection" of small customer's premises ends on a Friday or on a day before a Queensland wide or local holiday in the district where the premises is located, the distribution entity is not required to disconnect on that day but must disconnect by the next business day. This does not apply if the small customer has requested the disconnection.
(e) Until the end of 30 June 2008, the time required for completion of works on premises in ENERGEX's distribution area, other than premises in excluded locations, is six business days from receipt of a valid service order request, where the standard service order is "disconnection".

## Premises in Ergon Energy's distribution area

| Standard service order type | Feeder type through which the customer's premises is supplied | Time required for completion of works |
| :---: | :---: | :---: |
| New connection | CBD feeder / urban feeder | 5 business days of receipt of a valid service order request and all relevant documentation. |
|  | short rural feeder | 10 business days of receipt of a valid service order request and all relevant documentation. |
|  | long rural feeder | 10 business days of receipt of a valid service order request and all relevant documentation. |
|  | isolated feeder | 30 business days of receipt of a valid service order request and all relevant documentation. |
| Reconnection | CBD feeder / urban feeder | If a valid service order request is received by 1.00 pm on a business day, then on the same day. Otherwise the next business day. |
|  | short rural feeder | The next business day after receipt of a valid service order request. |

| Standard service order type | Feeder type through which the customer's premises is supplied | Time required for completion of works |
| :---: | :---: | :---: |
|  | long rural feeder / isolated feeder | 10 business days of receipt of a valid service order request. |
| Disconnection | CBD feeder / urban feeder / short rural feeder | 5 business days of receipt of a valid service order request. |
|  | long rural / feeder isolated feeder | 10 business days of receipt of a valid service order request. |
| Special read | CBD feeder / urban feeder | 4 business days of receipt of a valid service order request. |
|  | short rural feeder | 4 business days of receipt of a valid service order request. |
|  | long rural feeder | 5 business days of receipt of a valid service order request. |
|  | isolated feeder | By the business day agreed between the distribution entity and the retail entity after receipt of a valid service order request. |
| Additions and alterations <br> - Exchange meters <br> - Install meters <br> - Move meters <br> - Install controlled load <br> - Install hot water meter and control equipment | CBD feeder / urban feeder | 5 business days of receipt of a valid service order request and all relevant documentation. |
|  | short rural feeder | 10 business days of receipt of a valid service order request and all relevant documentation. |
|  | long rural feeder | 10 business days of receipt of a valid service order request and all relevant documentation. |
|  | isolated feeder | 30 business days of receipt of a valid service order request and all relevant documentation. |
| Meter Reconfigurations | CBD feeder / urban feeder | 20 business days of receipt of a valid service order request. |
|  | short rural feeder | By the business day agreed between the distribution entity and the retail entity after receipt of a valid service order request. |
|  | long rural feeder | By the business day agreed between the distribution entity and the retail entity after receipt of a valid service order request. |
|  | isolated feeder | By the business day agreed between the distribution entity and the retail entity after receipt of a valid service |

| Standard service order type | Feeder type through which the customer's premises is supplied | Time required for completion of works |
| :---: | :---: | :---: |
|  |  | order request. |
| Meter Investigation | CBD feeder / urban feeder | 15 business days of receipt of a valid service order request. |
|  | short rural feeder | 15 business days of receipt of a valid service order request. |
|  | long rural feeder | 15 business days of receipt of a valid service order request. |
|  | isolated feeder | 30 business days of receipt of a valid service order request. |
| Supply <br> Abolishment | CBD feeder / urban feeder | 20 business days of receipt of a valid service order request. |
|  | short rural feeder | By the business day agreed between the distribution entity and the retail entity after receipt of a valid service order request. |
|  | long rural feeder | By the business day agreed between the distribution entity and the retail entity after receipt of a valid service order request. |
|  | isolated feeder | By the business day agreed between the distribution entity and the retail entity after receipt of a valid service order request. |
| Miscellaneous Services | CBD feeder / urban feeder | The timeframe will depend on the work requested and will be subject to commercial negotiation between the distribution entity and the retail entity after receipt of a valid service order request. |
|  | short rural feeder | The timeframe will depend on the work requested and will be subject to commercial negotiation between the distribution entity and the retail entity after receipt of a valid service order request. |
|  | long rural feeder | The timeframe will depend on the work requested and will be subject to commercial negotiation between the distribution entity and the retail entity after receipt of a valid service order request. |
|  | isolated feeder | The timeframe will depend on the work requested and will be subject to commercial negotiation between the |

| Standard service <br> order type | Feeder type through <br> which the customer's <br> premises is supplied | Time required for completion of <br> works |
| :--- | :--- | :--- |
|  |  | distribution entity and the retail entity <br> after receipt of a valid service order <br> request. |

## Premises in ENERGEX's distribution area

| Standard service order type | Feeder type through which the customer's premises is supplied or location of premises | Time required for completion of works |
| :---: | :---: | :---: |
| New connection | All feeder types | 5 business days of receipt of a valid service order request and all relevant documentation. |
| Reconnection | All feeder types but excluding premises in excluded locations | If a valid service order request is received by 1.00 pm on a business day, then on the same day. Otherwise the next business day. |
|  | Excluded locations | 10 business days of receipt of a valid service order request. |
| Disconnection | All feeder types but excluding premises in excluded locations | $5^{6}$ business days of receipt of a valid service order request. |
|  | Excluded locations | 10 business days of receipt of a valid service order request. |
| Special read | All feeder types | 4 business days of receipt of a valid service order request. |
| Additions and alterations <br> - Exchange meters <br> - Install meters <br> - Move meters <br> - Install controlled load <br> - Install hot water meter and control equipment | All feeder types | 10 business days of receipt of a valid service order request and all relevant documentation. |
| Meter Reconfigurations | All feeder types | 20 business days of receipt of a valid service order request. |
| Meter Investigation | All feeder types | 15 business days of receipt of a valid service order request. |

[^4]| Standard service <br> order type | Feeder type through <br> which the customer's <br> premises is supplied or <br> location of premises | Time required for completion of <br> works |
| :--- | :--- | :--- |
| Supply <br> Abolishment | All feeder types | 20 business days of receipt of a valid <br> service order request. |
| Miscellaneous <br> Services | All feeder types | The timeframe will depend on the <br> work requested and will be subject to <br> commercial negotiation between the <br> distribution entity and the retail entity <br> after receipt of a valid service order <br> request. |

### 5.7.4 Requirement to Complete Disconnection Service Order Requests

(a) If completing a standard service order for disconnection (regardless of requested ServiceOrderSubType) would result in the temporary disconnection of multiple premises, a distribution entity is deemed to complete the service order if it employs the method of turn off main switch and sticker at the premises.
(b) If a disconnection referred to in paragraph (a) arises because a small customer is vacating the premises, the distribution entity:
(i) will not charge the financially responsible Market Participant for network tariffs relating to the premises during the compensation period; and
(ii) must pay the financially responsible Market Participant compensation calculated by multiplying the volume of consumption recorded at the premises during the compensation period by the average monthly regional reference price as published by the Australian Energy Market Operator for the month in which the compensation period ends.
(c) A retail entity may not charge a small customer for customer retail services for a disconnected premises during the compensation period.

## CHAPTER 6: CUSTOMER TRANSFER AND CONSENT

### 6.1 Application of this Chapter

### 6.1.1 Application

This Chapter applies to:
(a) all distribution entities;
(b) all retail entities; and
(c) unless otherwise specified, in relation to all customers for a NMI premises connected to a supply network forming part of the national grid.

### 6.2 Compliance obligations

### 6.2.1 Contracting customer transfer functions

A distribution entity or a retail entity must only contract with or engage another party to perform a function in relation to a customer transfer on the basis that the other party agrees to comply with Chapter 6 of this Code.

### 6.2.2 Compliance with MSATS procedures

A distribution entity or a retail entity must comply with any MSATS procedures as developed and published by $A E M O$ from time to time pursuant to the National Electricity Rules.

### 6.3 Consent

### 6.3.1 Obligation to obtain consent

(a) A retail entity must not initiate the creation of a $N M I$ or initiate or effect the transfer of a customer without obtaining the explicit informed consent of that customer.
(b) While section 55G of the Electricity Act is in force, Ergon Energy and its subsidiaries are not required to comply with this clause 6.3.1.

### 6.3.2 Form and retention of consent

(a) A retail entity may obtain the explicit informed consent of a customer:
(i) in writing signed by the customer;
(ii) verbally; or
(iii) by electronic communication signed by the customer.
(b) A retail entity must retain records of any explicit informed consent obtained under Chapter 6 of this Code for at least two years.
(c) Records retained under clause 6.3.2(b) must be retained by the retail entity in a format which permits the retail entity to answer any enquires relating to a customer's explicit informed consent by that customer, the QCA, the Energy
and Water Ombudsman Queensland or any other entity permitted by electricity legislation to access that information.

### 6.4 NMI discovery

### 6.4.1 NMI and NMI checksum

(a) A distribution entity must within one business day of a retail entity's request provide that retail entity with the NMI and NMI checksum for a NMI premises.
(b) A request made by a retail entity under paragraph (a) may be made by reference to a:
(i) unique meter identifier held by the distribution entity and advised to the retail entity;
(ii) $N M I$ address; or
(iii) DPID (as that term is defined in the CATS Procedures).
(c) Where a request made under paragraph (a) does not return a unique match, the distribution entity must provide all the returned matches to the retail entity, provided that if there are more than 99 matches, only the first 99 returned matches need be provided to the retail entity.
(d) Where a request made under paragraph (a) returns a unique match, the distribution entity must, unless otherwise advised by the retail entity, provide that NMI and NMI checksum for the relevant NMI premises.

### 6.4.2 NMI standing data

(a) A distribution entity must within one business day of a retail entity's request provide that retail entity with the NMI standing data for a NMI premises.
(b) A request made under paragraph (a) may only be made by reference to a NMI.

### 6.4.3 Information must not be available though MSATS

A request under clauses 6.4.1(a) or 6.4.2(a) may only be made by a retail entity if the relevant NMI, NMI checksum or NMI standing data are not available to that retail entity through MSATS.

### 6.4.4 Transitional provisions

For:
(a) in relation to all distribution entities, a period of three months from the FRC commencement date; and
(b) in relation to Ergon Energy, the entire period Ergon Energy is operating under the minimalist transitioning approach,
the relevant distribution entity will have two business days to provide the relevant data in response to a request under clause 6.4.1(a) or 6.4.2(a) rather than one business day.

### 6.5 Initiation of transfers by retail entities

### 6.5.1 Proposed transfers

(a) A proposed transfer of a customer's NMI to a new retail entity must be initiated by the new retail entity in accordance with any MSATS procedures as developed and published by $A E M O$ from time to time pursuant to the National Electricity Rules. The proposed transfer may be initiated prior to the expiry of any applicable cooling off period in the retail contract between the new retail entity and the customer.
(b) A retail entity must ensure that a transfer is not completed until the applicable cooling off period under the relevant retail contract has expired.

### 6.5.2 Cancellation of transfer

Where a retail entity has initiated a transfer in accordance with clause 6.5.1, it must cancel the customer transfer request in accordance with any MSATS procedures as soon as practicable where the retail contract is terminated by the customer during any applicable cooling-off period.

### 6.6 Meter read methods

(a) All permitted forms of meter readings used for the purposes of transferring a customer must be performed in accordance with the electricity legislation.
(b) Subject to paragraph (c), a transfer on an actual meter reading date must be based on an actual meter reading that is a scheduled meter reading or a special meter reading which:
(i) conforms with the CATS Procedures retrospectivity rule; or
(ii) occurred after the customer entered into the new retail contract.
(c) A retail entity must not transfer a customer on the basis of a special meter reading, unless it obtains explicit informed consent from that customer to:
(i) conduct the special meter reading; and
(ii) charge the customer for that special meter reading a fee which must be disclosed to the customer.
(d) A retail entity is not obliged to obtain explicit informed consent under clause 6.6(c) if it does not charge the customer for that special meter reading.

### 6.7 Notification of non-occurrence of transfer

Where a proposed new retail entity has previously advised a customer of the expected date of completion of a NMI transfer and that NMI transfer does not occur on that date and is not expected to occur within one month of that date, the retail entity must, within a reasonable time of becoming aware of the non-occurrence of the NMI transfer, use its best endeavours to advise the customer:
(a) that the customer transfer did not occur;
(b) of the reasons for the delay; and
(c) of the new expected date of completion of the customer transfer (if it is still proceeding).

### 6.8 Minimalist transitioning approach

### 6.8.1 Application

(a) Ergon Energy is declared, at the FRC commencement date, to be operating under the minimalist transitioning approach.
(b) The QCA may issue a notice to Ergon Energy declaring it will no longer be operating under the minimalist transitioning approach from the date 12 months from the date of the notice.
(c) Ergon Energy must include a notice on its website stating the minimalist transitioning approach applies to it until the minimalist transitioning approach ceases to apply to it.
(d) The QCA will review whether to issue a notice in accordance with paragraph (b) on an annual basis. In conducting this review, the QCA must consult with Ergon Energy, retail entities and any other person who has a legitimate interest in whether such a notice is to be issued.
(e) Clauses 6.8.2 and 6.8.5 only apply to Ergon Energy while it operates under the minimalist transitioning approach.

### 6.8.2 Discovery requests under a minimalist transitioning approach

(a) Ergon Energy must have the capacity to process a minimum of 150 requests each business day in total under clauses 6.4.1(a) and 6.4.2(a).
(b) If more than 150 requests are received in total under clauses 6.4.1(a) and 6.4.2(a) by Ergon Energy in a business day then Ergon Energy will employ a combination of the following measures as appropriate to minimise or temporarily change transaction completion times:
(i) increase the resources available for completing requests for information from retail entities, for example by increasing the total number of resources or the hours during which requests are processed;
(ii) increase the time for completing requests for information from retail entities beyond two business days; and
(iii) institute a queuing policy on the basis of the order of the receipt of requests for information from retail entities.
(c) If Ergon Energy is consistently receiving more than 150 requests in total under clauses 6.4.1(a) and 6.4.2(a) and reasonably expects that it is unable to complete these within two business days then it must advise affected retail entities:
(i) which of the measures it is taking to minimise transaction completion times; and
(ii) of the revised expected timeframes for completing requests for information.

### 6.8.3 NMI creation requests under a minimalist transitioning approach

(a) Ergon Energy must have the capacity to process a minimum of 40 NMI creation requests each business day under clause 6.8.4.
(b) If more than 40 NMI creation requests under clause 6.8.4 are received by Ergon Energy in a business day then Ergon Energy will employ a combination of the following measures as appropriate to minimise or temporarily change NMI creation completion times:
(i) increase the resources available for initiating NMI creations, for example by increasing the total number of resources or the hours during which NMI creation requests are processed;
(ii) increase the time for initiating NMI creations beyond two business days; and
(iii) institute a queuing policy on the basis of the order of receipt of NMI creation requests.
(c) If Ergon Energy is consistently receiving more than 40 NMI creation requests under clause 6.8.4 and reasonably expects that it is unable to initiate the requests in MSATS within two business days, then it must advise affected retail entities:
(i) which of the measures it is taking to minimise the timeframe for initiating NMI creations in MSATS; and
(ii) of the revised expected timeframes for initiating in MSATS the NMI creations requested.

### 6.8.4 Request to create a NMI

Where the NMI that is the subject of a proposed transfer is a small customer's NMI of Ergon Energy and that NMI is not in MSATS, the new retail entity must request the distribution entity to create the NMI and associated standing data in MSATS as soon as practicable after a negotiated retail contract has been entered into between the customer and the new retail entity.

### 6.8.5 Population of MSATS

Ergon Energy, while operating under the minimalist transitioning approach, will provide to AEMO the NMI and each required item of NMI standing data in respect of each connection point for which it is the distribution entity for those NMIs:
(a) with a NMI classification code of "LARGE"; or
(b) that have been the subject of a transfer request.

## CHAPTER 7: RETAIL MARKETING CONDUCT

## Preamble

The Telecommunications Act 1997, the Do Not Call Register Act 2006 and the Australian Consumer Law set out in Schedule 2 to the Competition and Consumer Act 2010 of the Commonwealth may also apply to retail marketers carrying out energy marketing activities. Chapter 7 of this Code is intended to operate in conjunction with these laws of general application. To the extent that there is any inconsistency between this Chapter and an applicable Commonwealth or State law, that law will take precedence.

Sections 120ZL and 120ZN of the Electricity Act deal with the interaction of this Chapter and the Fair Trading Act.

### 7.1 Application of this Chapter

### 7.1.1 Application

Subject to clauses 7.1.2 and 7.1.3, this Chapter applies to:
(a) all retail entities;
(b) unless otherwise specified, in relation to small customers, and non-regulated marketers are encouraged to comply with this Chapter 7.

### 7.1.2 Non-application to Ergon Energy

While section 55G of the Electricity Act is in force, Ergon Energy and its subsidiaries are not required to comply with this Chapter 7.

### 7.1.3 Non-application by agreement

This Chapter 7, or specified provisions of this Chapter 7, will not apply to a retail entity, or a marketer acting on the retail entity's behalf, where the retail entity has agreed in writing with a customer, by obtaining that customer's explicit informed consent, that this Chapter 7, or specified provisions of this Chapter 7, will not apply in respect of that customer, if:
(a) the customer:
(i) is a business customer;
(ii) has one or more premises or a group of premises;
(iii) is a small customer in respect of one or more of those premises; and
(b) the aggregate of the actual or expected annual energy consumption level for those premises equals or exceeds:
(i) in the case of a proposed electricity contract, 100 MWh of electricity per annum; or
(ii) in the case of a proposed dual fuel contract, 100 MWh of electricity per annum or 1 TJ of gas per annum.

### 7.2 Compliance

### 7.2.1 Compliance

(a) A retail entity is responsible under this Chapter 7 for the conduct of any person who is employed, engaged or authorised by the retail entity to carry out marketing on the retail entity's behalf, including a non-regulated marketer whose actions result, or are intended to result, in the retail entity entering into a retail contract with a small customer for the provision of customer retail services.
(b) A retail entity will not be responsible for the conduct of a non-regulated marketer who is employed, engaged or authorised by a small customer or group of small customers to act on their behalf, whose actions result, or are intended to result, in the small customer or group of small customers entering into a retail contract with a retail entity for the provision of customer retail services.

### 7.2.2 Statement of compliance

A retail entity must use its best endeavours to obtain a written statement from a nonregulated marketer confirming the non-regulated marketer's compliance with this Chapter 7 where the non-regulated marketer has introduced a small customer to the retail entity or has arranged or facilitated a retail contract on behalf of that retail entity.

### 7.3 General conduct standards

A marketer or salesperson must while engaged in marketing:
(a) comply with all applicable Commonwealth and State laws;
(b) not engage in misleading, deceptive or unconscionable conduct, whether by act or omission;
(c) not exert undue pressure on a small customer, nor harass or coerce a small customer;
(d) use words and images that promote small customers' comprehension of retail contracts;
(e) ensure that information provided to small customers is truthful and in plain language;
(f) ensure that information provided to individual small customers is relevant to that small customer's circumstances; and
(g) provide only timely, accurate, verifiable and truthful comparisons.

### 7.4 Time of contact

### 7.4.1 Door knocking

Except by prior appointment, a marketer or salesperson must not visit a small customer for the purpose of marketing a retail contract:
(a) at any time on a Sunday or a public holiday; or
(b) on a Saturday:
(i) between midnight and 9.00 a.m.; or
(ii) between 5.00 p.m. and midnight; or
(c) on any other day:
(i) between midnight and 9.00 a.m.; or
(ii) between 6.00 p.m. and midnight.

### 7.4.2 Telephone marketing

Except by prior appointment, a marketer or salesperson must not telephone a small customer for the purpose of marketing a retail contract:
(a) at any time on a Sunday or a public holiday; or
(b) on a Saturday:
(i) between midnight and 9.00 a.m.; or
(ii) between 5.00 p.m. and midnight; or
(c) on any other day:
(i) between midnight and 9.00 a.m.; or
(ii) between 8.00 p.m. and midnight.

### 7.5 Marketing contacts

### 7.5.1 Identification

As soon as practicable following the commencement of any marketing contact with a small customer, a marketer or salesperson must advise the small customer of:
(a) the purpose of the marketing contact;
(b) the name of the salesperson; and
(c) the name of the marketer and, if different, the name of the retail entity on whose behalf the marketer is acting.

### 7.5.2 Contact details

Prior to completion of a marketing contact with a small customer, the marketer or salesperson must use its best endeavours to provide a small customer with contact details for the marketer and, if different, the retail entity on whose behalf the marketer or salesperson is acting.

### 7.5.3 Termination of marketing contacts

(a) If a small customer requests the termination of a marketing contact, the marketer or salesperson must:
(i) immediately comply with that request;
(ii) refrain from contacting that small customer again for the purposes of marketing or for an incidental or related purpose for a period of 30 days from the date of the request, unless otherwise advised by the small customer;
(iii) advise the small customer of the existence of the dispute resolution service provided by the marketer, or, if the marketer is not a retail entity, the retail entity on whose behalf the marketer or salesperson is acting; and
(iv) if requested by the small customer, provide details, including contact details, of that dispute resolution service.
(b) To avoid doubt, paragraph (a) does not apply where a small customer defers a marketing contact to another date.

### 7.5.4 Marketing in person

(a) A marketer or salesperson who makes a marketing contact by visiting a small customer must wear an identification card on his or her chest containing:
(i) a photograph of the marketer or salesperson; and
(ii) the name of the marketer or salesperson and, if different, the retail entity on whose behalf the marketer is acting.
(b) A marketer or salesperson who makes a marketing contact by visiting a small customer must also provide the small customer with:
(i) the retail entity's telephone number for enquiries, verifications and complaints; and
(ii) the address (not being a post office box) of the retail entity on whose behalf the marketer or salesperson is acting as soon as practicable and in any event before starting to negotiate.

### 7.5.5 Information and details to be provided in writing where marketing is in person

Information or details required to be provided to a small customer under clause 7.5.1, 7.5.2 or 7.5 .3 must be provided to the small customer in writing if the marketer or salesperson is making the marketing contact by visiting the small customer.

### 7.5.6 Marketing by telephone

A marketer or salesperson who makes a marketing contact with a small customer by telephone must use its best endeavours to:
(a) comply with the requirements of clauses 7.5.1 and 7.5.2; and
(b) provide the small customer with sufficient contact details so that the small customer can contact the marketer or a salesperson by return telephone call if he or she requires.

### 7.5.7 Marketing by electronic means

A marketer or salesperson who makes a marketing contact with a small customer by means of an electronic communication must:
(a) comply with the requirements of clauses 7.5.1 and 7.5.2; and
(b) provide the small customer with sufficient contact details so that the small customer can contact the marketer or a salesperson by return electronic communication if he or she requires.

### 7.5.8 Record keeping standards

To enable the identification of marketers and salespeople by small customers and to assist marketers and small customers in dealing with enquiries, verifications and complaints, a marketer must, for at least one year from the date of a marketing contact, use its best endeavours to keep records of:
(a) all marketing contacts with small customers, whether initiated by the marketer or the small customer;
(b) small customer requests not to be contacted by the marketer; and
(c) marketing contacts which have been terminated at the request of the small customer.

### 7.6 Written disclosure statement

When a marketing contact results, or is intended to result, in a small customer entering into a negotiated retail contract, or when a small customer contacts a marketer for the purposes of entering into a negotiated retail contract, the following information must be provided in writing to the small customer by the marketer in a written disclosure statement at the time the negotiated retail contract is entered into or, if the contract is entered into over the telephone, within two business days of the negotiated retail contract being entered into:
(a) the name and address for service of the marketer, or, if different, the retail entity on whose behalf the marketer is acting;
(b) the postal address, facsimile number and email address of the marketer or, if different, the retail entity on whose behalf the marketer is acting;
(c) the date of commencement of the negotiated retail contract;
(d) the prices, charges, tariffs and service levels that will be applicable in respect of the negotiated retail contract;
(e) if the prices, charges, tariffs or service levels are able to be changed by the retail entity under the negotiated retail contract, the manner in which any such change may be effected;
(f) the costs to the small customer associated with entering into the negotiated retail contract, outside of the prices, charges and tariffs payable (including any costs associated with the provision of infrastructure such as meters);
(g) the type and frequency of bills which will be rendered under the negotiated retail contract;
(h) the payment methods and options which are available in respect of the negotiated retail contract;
(i) the early termination charges which may apply in the event that the small customer terminates a fixed-term contract prior to its expiry date and the method of calculation of those charges;
(j) the enforcement expenses which may become payable in the event of a breach of the negotiated retail contract by the small customer;
(k) the dispute resolution options which are available to small customers;
(1) details of the right conferred on the small customer to rescind the negotiated retail contract in accordance with the Code;
(m) if a commission, fee or reward is to be paid for the introduction of business to the retail entity:
(i) a statement of that fact;
(ii) details of the person by whom the commission, fee or reward is payable; and
(iii) details of the person to whom the commission, fee or reward is payable.

### 7.7 Consent

(a) Whenever a marketer is required to obtain the consent of a small customer, including the consent to enter into a retail contract, that consent must be the explicit informed consent of a small customer obtained only after timely, accurate, verifiable and truthful information on the consequences of providing consent has been made available to the small customer by the marketer (for example, through the use of a disclosure statement under clause 7.6).
(b) A marketer must retain records of any explicit informed consent obtained under this Code for at least two years.
(c) Records retained under paragraph (b) must be retained by the marketer in a format which permits the marketer to answer any enquiries relating to a customer's explicit informed consent by that small customer, the QCA, the Energy and Water Ombudsman Queensland or any other entity permitted by electricity legislation to access that information.

### 7.8 Training and product knowledge

A marketer must ensure that the marketer's employees, agents and contractors have sufficient training and knowledge so as to be able to comply with Chapter 7 of this Code and all other relevant legislative requirements.

### 7.9 Privacy

While engaged in marketing, a marketer must, in dealing with a small customer's customer information, comply with the Privacy Act 1988 (Cwlth).

A marketer must inform a small customer of the marketer's privacy obligations at the request of the small customer.

## CHAPTER 8: RETAIL MARKET INFORMATION

### 8.1 Application of this Chapter

### 8.1.1 Application

Subject to clause 8.1.2, this Chapter applies to all retail entities and, with respect to clause 8.5.5, all distribution entities.

### 8.1.2 Non-application to Ergon Energy

While section 55G of the Electricity Act is in force, Ergon Energy and its subsidiaries are only required to comply with clause 8.5 of this Chapter 8.

### 8.2 Price fact sheets

### 8.2.1 Publishing price fact sheets

For each negotiated retail contract that a retail entity offers to residential customers the retail entity must, in relation to that negotiated retail contract:
(a) publish a price fact sheet on its website;
(b) in combination with, or included within, any written disclosure statement provided to a residential customer under the requirements of clause 7.6 of this Code, provide a price fact sheet; and
(c) provide a price fact sheet to a residential customer on request.

### 8.2.2 Form of price fact sheet

A price fact sheet published or provided in accordance with clause 8.2.1 may take the form of an energy price fact sheet that complies with the requirements of the $A E R$ Retail Pricing Information Guideline. This does not include a requirement that an energy price fact sheet be generated by the AER Price Comparator website (www.energymadeeasy.gov.au); or that it be identified by a unique reference code, or a unique name and unique reference code, generated by that website; or that it include information about that website.

The price fact sheet must clearly indicate whether the negotiated retail contract is available to customers with solar photovoltaic systems. If the negotiated retail contract is available to customers with solar photovoltaic systems, the price fact sheet must also clearly indicate the solar feed-in tariff (or solar feed-in tariffs if there are more than one) available to customers entering into the negotiated retail contract.

Nothing in this clause 8.2 restricts a retail entity providing the price fact sheets in conjunction with other marketing or information material.

### 8.2.3 Expression of price information

In any promotional or marketing information provided by a retail entity or on behalf of a retail entity to a residential customer, prices must be expressed as inclusive of GST.

### 8.3 Provision of information to the QCA

### 8.3.1 Provision of information to the QCA

In relation to each type of negotiated retail contract that a retail entity offers to residential customers, the retail entity must provide the QCA with accurate and full information about that type of negotiated retail contract. The information must clearly indicate whether the negotiated retail contract is available to customers with solar photovoltaic systems. If the negotiated retail contract is available to customers with solar photovoltaic systems, the information must also clearly indicate the solar feed-in tariff (or solar feed-in tariffs if there are more than one) available to customers entering into the negotiated retail contract.

A retail entity may satisfy its obligations under this clause 8.3 .1 by providing the $Q C A$ with information in the form of an energy price fact sheet that complies with the requirements of the AER Retail Pricing Information Guideline. This does not include a requirement that an energy price fact sheet be generated by the AER Price Comparator website (www.energymadeeasy.gov.au); or that it be identified by a unique reference code, or a unique name and unique reference code, generated by that website; or that it include information about that website.

### 8.4 Price comparator

### 8.4.1 Development of price comparator

(a) The QCA must develop and make available on its website a price comparator so that a residential customer can compare an offer it receives to enter into a negotiated retail contract against the types of negotiated retail contracts offered by retail entities and the standard retail contract.
(b) The price comparator must:
(i) be developed with the objective of enabling residential customers to compare types of negotiated retail contracts and the standard retail contract;
(ii) prompt the residential customer to provide details of electricity consumption from their bills (up to four) and details from any offer they have received from a retail entity; and
(iii) show the estimated annual electricity costs under each type of negotiated retail contract and standard retail contract when electricity consumption details are entered by residential customers and any savings the residential customer could make by entering into a standard retail contract or a negotiated retail contract other than the offer they have received from the retail entity.
(iv) indicate whether each negotiated retail contract is available to customers with solar photovoltaic systems; and
(v) if a negotiated retail contract is available to customers with solar photovoltaic systems, indicate the solar feed-in tariff (or solar feed-in tariffs if there are more than one) available to customers entering into that contract.
(c) The price comparator will only be a guide and this should be made clear to residential customers that use the price comparator.
(d) The price comparator need only deal with price components of negotiated retail contracts in monetary terms and need not deal with non-cash rewards such as vouchers, discounts on other products or services or any eligibility for an energy concession in financial comparisons. However, the price comparator must include a field that provides for a text description of any non-cash rewards offered by the retail entity under the contract.
(e) Nothing in this clause 8.4 prohibits the $Q C A$ developing and making available a single price comparator that compares prices for the provision of both electricity and gas.

### 8.5 Review of developments in full retail competition

### 8.5.1 QCA monitoring and reporting role

The $Q C A$ must,
(a) monitor the development of the Queensland electricity market by reviewing the data provided by all retail entities under clauses 8.5 .2 to 8.5 .4 and by all distribution entities under clause 8.5.5 and 8.5.6;
(b) publish on a quarterly basis in aggregate:
(i) the number of $L A R G E$ and SMALL NMIs;
(ii) the indicative number of market NMIs relating to large customers; and
(iii) the indicative number of market NMIs relating to small customers;
(c) publish on a quarterly basis by retail entity the information on customer disconnections provided by retail entities under clause 8.5.3; and
(d) publish on a quarterly basis by retail entity the information on customer complaints provided by the retail entities under clause 8.5.4.

### 8.5.2 Retail entities to supply the number of market and non-market customers

(a) Each retail entity must, within one month after the end of each quarter, provide to the QCA the number of large and small market NMIs as at the end of that previous quarter.
(b) Each retail entity must, within one month after the end of each quarter, provide to the QCA the number of large and small non-market NMIs as at the end of that previous quarter.

### 8.5.3 Retail entities to supply customer disconnection data

Each retail entity must, within one month after the end of each quarter, supply to the QCA data that details:
(a) the total number of the retail entity's small business customers that were disconnected;
(b) the number of the retail entity's small business customers that were disconnected in each of the following categories;
(i) due to non payment;
(ii) at a premises due to non payment but who have been reconnected with the same name at the premises;
(iii) at a premises due to non payment but who have been reconnected within seven days with the same name at the premises;
(c) the total number of the retail entity's small residential customers that were disconnected;
(d) the number of the retail entity's small residential customers that were disconnected in each of the following categories:
(i) due to non payment;
(ii) at a premises due to non payment but who have been reconnected with the same name at the premises;
(iii) at a premises due to non payment but who have been reconnected within seven days with the same name at the premises;
(iv) at a premises due to non payment and who hold a pensioner or concession card; and
(v) at a premises due to non payment and who hold a pensioner or concession card, but who have been reconnected with the same name at the premises.
(e) the number of the retail entity's small residential customers that:
(i) are participating in a hardship program;
(ii) were denied access to a hardship program; and
(iii) have exited a hardship program.
(f) the average debt on entry to a retail entity's hardship program, of the retail entity's small residential customers that are participating in that hardship program,
(g) the average length of time the retail entity's small residential customers that are participating in a hardship program remain in that program
for the previous quarter.

### 8.5.4 Retail entities to supply customer complaint data

Each retail entity must, within one month after the end of each quarter, supply to the QCA data that details the number of complaints received from small customers (separated into those received from small business customers and small residential
customers) in respect of their actions or omissions as a retail entity, for the following categories:
(a) total number of complaints;
(b) billing or account complaints;
(c) marketing complaints; and
(d) other complaints,
for the previous quarter.

### 8.5.5 Distribution entities to supply number of NMI premises

(a) Each distribution entity must, within one month after the end of each quarter provide to the QCA the number of large and small NMI premises as at the end of that previous quarter.
(b) Ergon Energy and its subsidiaries will exclude all NMI premises on supply networks not forming part of the national grid from the information provided to the $Q C A$ under clause 8.5.5(a).

### 8.5.6 Distribution entities to supply disconnection data

Each distribution entity must, within one month after the end of each quarter, provide the QCA data that details:
(a) the total number of small business customers that were disconnected at the instigation of the distribution entity;
(b) the number of small business customers that were disconnected at the instigation of the distribution entity for non payment;
(c) the number of small business customers that were disconnected at the instigation of the distribution entity for safety reasons;
(d) the number of small business customers that were disconnected at the instigation of the distribution entity for other reasons;
(e) the total number of small residential customers that were disconnected at the instigation of the distribution entity;
(f) the number of small residential customers that were disconnected at the instigation of the distribution entity for non payment;
(g) the number of small residential customers that were disconnected at the instigation of the distribution entity for safety reasons;
(h) the number of small residential customers that were disconnected at the instigation of the distribution entity for other reasons;
(i) the total number of small business customer disconnections and the number of small business customer disconnections due to non payment that the distributor performed at the request of each retail entity,
(j) the total number of small residential customer disconnections and the number of small residential customer disconnections due to non payment that the distributor performed at the request of each retail entity,
for the previous quarter.

## CHAPTER 9: METERING

### 9.1 Application

### 9.1.1 Purpose

The purpose of this Chapter is to regulate those matters that relate to electricity metering for:
(a) connection points for type 7 metering installations where the relevant customer is, or is taken to be, an excluded customer under the Electricity Act; and
(b) points of supply in isolated power systems.

### 9.1.2 Application of this chapter

This chapter applies:
(a) to all distribution entities in regard to metering for those matters specified in clause 9.1.3;
(b) to all area retail entities in regard to:
(i) metering to the extent specified in clause 9.1.3; and
(ii) their first-tier connection points in relation to clause 9.4.8; and
(c) to isolated generators that operate in parallel with electricity supplied from a distribution entity's supply network. To avoid doubt, a generator in this Code includes an IES generator and other very small generators.

### 9.1.3 Scope

(a) This Chapter applies to type 1 to 7 metering installations that are not covered by the National Electricity Rules, being connection points where the customer for the relevant premises is, or is taken to be, an excluded customer under the Electricity Act.
(b) This chapter applies to card operated meters.
(c) This chapter applies to metering installations located in isolated power systems.
(d) This chapter applies to interval meters. However, an interval meter will be either read remotely (a type 1 to 4 metering installation) or the accumulation display will be manually read (a type 6 metering installation). There is no obligation on the responsible person to manually read the interval energy data from an interval meter (a type 5 metering installation).
(e) A distribution entity may only classify a connection point as a type 7 metering installation if the metering installation meets the criteria for the classification of a type 7 metering installation in Schedule 7.2.3 of the National Electricity Rules.
(f) This Chapter does not regulate metering requirements for connection points that may be classified as first-tier, second-tier, market load or intending load in accordance with clause 2.3.1 of the National Electricity Rules.

### 9.1.4 Responsibility for meter provision and energy data services

(a) The distribution entity or the area retail entity, at the area retail entity's discretion, is the responsible person for first-tier type 1, type 2, type 3 and type 4 metering installations.
(b) The distribution entity is the responsible person for first-tier type 5, type 6 and type 7 metering installations.
(c) The responsible person is responsible for the provision, installation, replacement, maintenance, inspection and testing of the metering installation at the metering point.
(d) The responsible person is responsible for the reading and processing of energy data for metering installations.
(e) The distribution entity is responsible for determining the connections points or points of supply allowed to be type 7 metering installations in accordance with clause 9.1.3(e).

### 9.1.5 Background information

The references contained in clause 1.5 of Part A of the Metrology Procedure provide background information to this Chapter.

### 9.1.6 Interpretation

(a) In this Chapter 9, a reference to 'Schedule' is a reference to a Schedule in the Metrology Procedure unless otherwise specified.
(b) The volume threshold for a connection point, other than determining the volume threshold for a metering installation, should be determined in accordance with the methodology for deciding the classification of customers contained in the Electricity Regulations.

### 9.2 Preliminary issues

### 9.2.1 Metering installation components

(a) Primary components associated with the metering installation for a connection point or a point of supply, where applicable, are identified as:
(i) the metering point;
(ii) the current transformers and voltage transformers, as applicable;
(iii) the measurement element;
(iv) the data logger;
(v) the communications link;
(vi) energy data services within the communication link;
(vii) testing and inspection; and
(viii) management, maintenance and auditing.
(b) In addition to the primary components specified in paragraph (a) above, the metering installation includes the distribution entity's control equipment for the purpose of this Chapter 9.
(c) The primary components, their characteristics and associated service requirements as itemised in Schedules 1 to 6 of the Metrology Procedure apply to this Code, except where varied in this Chapter 9.
(d) The following indicative diagram applies to a type 1 to 4 metering installation installed at a point of supply:

Types 1 to 4 Metering Installation

[Consultation Note: in this diagram the reference to AEMO at the Metering Database point has been removed.]
(e) The following indicative diagram applies to a type 6 metering installation installed at a point of supply:

Type 6 Metering Installation

[Consultation Note: in this diagram the reference to AEMO at the Metering Database point has been removed.]

### 9.2.2 Dispute resolution

(a) Dispute resolution on any matter associated with this Chapter 9 must be managed in the following way:
(i) any dispute arising under this Chapter 9 between a responsible person and a distribution entity or an area retail entity must be resolved by agreement between the parties in accordance with the relevant co-ordination agreement;
(ii) any dispute arising under this Chapter 9 between a responsible person and an isolated generator must be resolved by agreement between the parties. If an agreement cannot be reached, the responsible person must offer to submit the dispute to commercial arbitration for resolution; and
(iii) a dispute between a responsible person and a customer is to be resolved in accordance with the relevant connection contract, where the responsible person is a distribution entity, or the relevant retail contract, where the responsible person is the area retail entity, that exists between the parties.
(b) In any dispute about records of the amount of electricity supplied to a metering point, clause 9.4.10(d) applies for type 1 to 6 metering installations and a distribution entity procedure applies for type 7 metering installations.
(c) The responsible person involved in a dispute of the kind referred to in paragraph (b) must keep all records in relation to the dispute for a period of seven (7) years from the resolution of the dispute.

### 9.2.3 Disaster recovery

The responsible person must use its reasonable endeavours to ensure that the metering installation database is operated in accordance with sound disaster recovery practices.

### 9.2.4 Document responsibility

(a) A distribution entity must make available a copy of this Chapter through its website, and on request of a customer, provide that customer with a copy of this Chapter.
(b) A distribution entity may impose a reasonable charge on a person who requests multiple or subsequent hard copies of this Chapter.

### 9.2.5 Appendix and Schedules

Those Appendices and Schedules in the Metrology Procedure that are referenced in this Chapter form part of this Code.

### 9.3 Responsibility for meter provision

### 9.3.1 Application of clause 9.3

(a) This clause 9.3 relates to the provision of meters to points of supply in isolated power systems.
(b) A reference to a Metering Provider in this clause 9.3 is a reference to a Metering Provider that is registered with AEMO as either class MPA or MPB.

### 9.3.2 Overall responsibility requirements

(a) Metering Providers must be registered with AEMO on the basis of the capabilities required for type 1, type 2, type 3 and type 4 metering installations as specified in Schedule 7.4 of the National Electricity Rules, as appropriate.
(b) Within one year after the FRC commencement date, Metering Providers must be registered with $A E M O$ on the basis of the capabilities required for type 5 , type 6 and type 7 metering installations as specified in Schedules 15, 16 and 17 of the Metrology Procedure, respectively.
(c) A responsible person is required to use Metering Providers to provide, install, routinely test and maintain the relevant primary components, characteristics and service requirements of the metering installation.
(d) A responsible person is responsible for the design of a metering installation and warrants that the design delivers the primary components, characteristics and service requirements as specified in Schedules 1 to 6 of the Metrology Procedure, as appropriate.
(e) A responsible person must ensure the components have been selected, properly installed and initially tested so that the metering installation satisfies the accuracy and performance requirements for metering installations
(f) A Metering Provider is required to provide, install, routinely test and maintain the metering installation and its associated primary components in accordance with the service requirements of Schedules 1 to 6 of the Metrology Procedure.
(g) A metering installation may be used for purposes other than billing, providing:
(i) such additional usage does not compromise compliance with the requirements of this Code; and
(ii) the responsible person must coordinate the different uses of the metering installation so that the characteristics of the metering installation and access to the energy data from the metering installation remain consistent with the requirements of this Code.

### 9.3.3 Metering installation components - meter provision

(a) The Metering Provider appointed by the responsible person is permitted to use:
(i) interval meters and associated equipment;
(ii) accumulation meters and associated equipment, but only where they do not contravene the new and replacement requirements as specified in clause 9.3.7; and
(iii) communication arrangements (manual or electronic) that allow the meter to be read and the energy data to be transported to an approved database.

Combinations of communication arrangements are also permitted.
(b) The responsible person must ensure that the components, characteristics and service requirements for meter provision for type 1 , type 2 , type 3 , type 4 , type 5 and type 6 metering installations comply with Schedules 1, 2 and 3 of the Metrology Procedure, as appropriate.
(c) Where the responsible person has engaged a Metering Provider in order to undertake the work required by paragraph (b), the responsible person must advise the Metering Provider of the appropriate components, characteristics and service requirements that are to be used for the metering installation, as outlined in Schedules 1 to 3 of the Metrology Procedure.
(d) Metering installations which have been installed, or which are planned to be installed by the responsible person, prior to the FRC commencement date, and which met the Queensland requirements at that date, are deemed to meet the requirements of this Code.
(e) Where the metering installation includes equipment for time switching or load control, or the measurement of reactive energy, the installation and operation of that equipment may be governed by an instrument other than Chapter 9 of this Code, for example, the co-ordination agreement.
(f) Metering equipment used for controlled loads must have the characteristics and requirements in accordance with Schedules 1, 2 and 3 of the Metrology Procedure, as applicable.

### 9.3.4 Transitional provision for existing temporary builders' supplies

Despite clause 9.3.3(d) and any other provision of this Code:
(a) temporary supplies to builders' installations connected before 1 July 2007 may remain unmetered until the end of 31 December 2007, but must be metered in accordance with this Code from this date; and
(b) all new temporary supplies to builders' installations connected on and from 1 July 2007 must be metered in accordance with this Code.

### 9.3.5 Reversion of metering installation types

(a) The responsible person must ensure that an interval meter, whether manually read or remotely read, once installed, is not replaced by an accumulation meter.
(b) The responsible person must ensure that if a second-tier interval meter which is installed for a LARGE NMI premises reverts to first-tier, it is not replaced by an accumulation meter.
(c) The responsible person may convert a remotely read interval meter to an interval meter, which will be manually read as an accumulation meter, if the point of supply is reclassified as a SMALL NMI premises.

### 9.3.6 Testing and inspection of metering equipment

(a) The responsible person must ensure that type 1, type 2, type 3, type 4, type 5 and type 6 metering installations are tested and inspected in accordance with the Metrology Procedure.
(b) A responsible person must ensure the repair or replacement of any defective or damaged metering equipment, including the replacement of any broken seals, as soon as practicable after the responsible person is notified of, or becomes aware of, the defect, damage or broken seal.
(c) A customer, isolated generator or area retail entity may request a test of the accuracy of metering equipment as set out below:
(i) in accordance with Chapter 4 of this Code, a customer may request its area retail entity to arrange a test of the accuracy of the metering equipment at its metering point;
(ii) an area retail entity, in accordance with Chapter 5 of this Code, may request the responsible person to perform a test of the accuracy of the metering equipment installed at their metering point. The request by the area retail entity may be on behalf of the customer or for the area retail entity's purpose;
(iii) an isolated generator may request the responsible person to perform a test of the accuracy of the metering equipment installed at their metering point;
(iv) the responsible person must ensure that a test of the metering equipment is carried out in accordance with Chapter 5 for the area retail entity request, and with similar service levels for a customer request;
(v) a representative of the customer, isolated generator or area retail entity may be present during the test of the metering equipment;
(vi) the responsible person must give notice of the results of the test to the person requesting the test; and
(vii) the responsible person may charge for performing the test of the metering equipment unless the tests show that the metering equipment is defective.

### 9.3.7 Installation of meter

(a) The responsible person must ensure that when each meter and associated data logger (where the data logger is located at the metering point) of a type 1, type 2 , type 3 , type 4 or type 5 metering installation or each meter of a type 6 metering installation is installed, it is checked to ensure that it:
(i) complies with the relevant requirements of Schedules 1, 2 or 3 of the Metrology Procedure, respectively;
(ii) has been tested and inspected prior to installation in accordance with the relevant requirements of Schedules 1, 2 and 3 of the Metrology Procedure, respectively;
(iii) has the optical port, communications port, and/or visual display located so that the optical port, communications port, and/or visual display can be readily accessed for meter reading; and
(iv) complies with the relevant Electricity Connection and Metering Manual, which each distribution entity must publish and update from time to time.
(b) The responsible person must, when requested by an area retail entity, make a metering installation available to a connection point or point of supply within the period specified in Chapter 5 of this Code.
(c) The responsible person must, when requested by an isolated generator, make a metering installation available to a point of supply within a period as agreed between the parties.
(d) The area retail entity must ensure that, where the connection point has a customer with a negotiated retail contract and the consumption is above the $Y$ Value, the connection point must have a type 1, type 2, type 3 or type 4 metering installation in accordance with Schedule 1 of the Metrology Procedure.
(e) To avoid doubt, the responsible person is not required to ensure that, where a premises connected to isolated power systems has never had a customer with a negotiated retail contract, or consumption is below the $Y$ value, interval meters are to be installed in new or replacement situations.
(f) The responsible person must ensure that where electricity is imported to the supply network by a customer, and a metering installation is required for the purpose of billing that imported electricity, the quantity of imported electricity must be separately measured to that of any exported electricity.
(g) The responsible person must ensure that in all situations, an interval meter installed after the FRC commencement date must be capable of being upgraded for use in a type 4 metering installation (as defined in the version of the National Electricity Rules or Metrology Procedure effective at the time the interval meter is installed) without replacing the meter.
(h) Where:
(i) the area retail entity alters a type 5, 6 or 7 metering installation to make it capable of remote acquisition;
(ii) the alteration leads to a change in the classification of that metering installation; and
(iii) the distribution entity is the responsible person for that metering installation,
the parties must negotiate in good faith to ensure the distribution entity is reasonably compensated for the alteration to the metering installation.

### 9.4 Responsibility for energy data services

### 9.4.1 Application of clause 9.4

(a) The requirements of this clause 9.4 apply to type 1 , type 2 , type 3 , type 4 , type 5 , type 6 and type 7 metering installations where applicable.

Type 1, type 2, type 3 and type 4 metering installations do not in general have a metering installation database, and accordingly are not referenced in a number of clauses in this clause 9.4.
(b) A reference to a Metering Provider in this clause 9.4 is a reference to a Metering Provider that is registered with AEMO as an MDP.

### 9.4.2 Metering installation components - energy data services

(a) The responsible person must ensure that, as a minimum, the components, characteristics and service requirements for energy data services for type 1, type 2, type 3 and type 4 metering installations comply with the Service Level Requirements published by $A E M O$.
(b) The responsible person must ensure that, as a minimum, the components, characteristics and service requirements for energy data services for type 5 and type 6 metering installations comply with Schedules 4 and 5 of the Metrology Procedure respectively.
(c) The responsible person is required to use a Metering Provider to undertake the reading and processing of energy data for relevant metering installations.
(d) Where the responsible person has engaged a Metering Provider, the responsible person must advise that Metering Provider of the components, characteristics and service requirements that are to be used for the metering installation (as outlined in Schedules 4 and 5 of the Metrology Procedure).

### 9.4.3 Meter reading

(a) An interval meter installed for a SMALL NMI will be read as an accumulation meter unless the metering installation is classified as types 1 to 4.
(b) An interval meter installed for a large market customer must be read as a remotely read interval meter.
(c) An interval meter installed for a large non-market customer where the connection point has never had a customer with a negotiated retail contract will be read as an accumulation meter by the Metering Provider.
(d) Where an interval meter is installed for an import connection point the Metering Provider must read the energy data in accordance with the request by the isolated generator or the area retail entity.
(e) Interval energy data from an interval meter that measures exported electricity must not be manually collected. If the interval energy data is required, it will be collected by remote acquisition. Otherwise the interval meter will be read as an accumulation meter.
(f) Deleted
(g) Deleted
(h) The distribution entity may make arrangements to alter any type 5, 6 or 7 metering installation and remotely acquire energy data. This will not alter the classification of those metering installations where the distribution entity decides on reasonable grounds that operational difficulties require the remote acquisition of energy data.
(i) For the purposes of paragraph (f), operational difficulties may include locational difficulties where the metering installation is:
(i) at a site where access is difficult; or;
(ii) on a remote rural property.
(j) The Metering Provider is the only person permitted to provide metering data to the responsible person, who must provide that data:
(i) Deleted;
(ii) to the distribution entity for network billing; and
(iii) to the area retail entity for retail billing and wholesale reconciliation purposes.
(k) A distribution entity is permitted to read the metering equipment for its own purpose providing the reading schedule is coordinated with the responsible person.
(1) The responsible person must:
(i) use reasonable endeavours to collect an actual meter reading for every meter associated with a scheduled meter reading;
(ii) arrange for a scheduled meter reading to be performed at least once every 14 weeks, except:
(A) for a SMALL NMI premises with a card operated meter, a scheduled meter reading is to be arranged at least once every 52 weeks; and
(B) for an operational grouping of NMIs for connection points that are not supplied through a $C B D$ feeder or an urban feeder with a meter reading rate of less than 100 NMIs per business day, a scheduled meter reading is to be arranged at least once every 52 weeks.
(C) Deleted
(m) Deleted.
(n) Subject to paragraph (1), for type 6 metering installations, the responsible person must:
(i) ensure that accumulated energy data is collected from meters representing at least $99.8 \%$ of estimated total consumption, based on the previous 12 month period, for type 6 metering installations for which that responsible person is responsible and this data is transferred to the metering installation database of a type 6 metering installation at a frequency which is at least once every 28 weeks; and
(ii) deleted
(o) For the purposes of paragraphs (m) and (C), data collected includes energy data that has been substituted in accordance with clause 9.4.4(c).
(p) The responsible person must use best endeavours to ensure that energy data is collected from a meter and this data is transferred to the relevant metering installation database, no more than two business days prior to, or two business days subsequent to, the date of a scheduled meter reading for that metering installation.
(q) The responsible person must ensure that a schedule is developed and maintained to determine the dates of the next scheduled meter reading for each metering installation in accordance with clause 3.3.3 of the Metrology Procedure.
(r) The area retail entity may, in accordance with the Chapter 5 of this Code, request that the responsible person arrange for a special meter reading on a nominated date.
(s) The responsible person must arrange, in accordance with Chapter 5 of this Code, for any special meter reading to be undertaken in accordance with customer transfer arrangements as specified in Chapter 6 of this Code.

### 9.4.4 Validation and substitution of energy data

(a) For the purpose of this clause 9.4.4, a reference to a type 5 metering installation in Schedule 7 of the Metrology Procedure is also to be taken as a reference to type 1, type 2, type 3 and type 4 metering installations.
(b) Subject to clause 9.4.3(j), the responsible person must ensure that energy data collected for a type 1 , type 2 , type 3 , type 4 or type 6 metering installation in accordance with clause 9.4.3, is validated in accordance with the validation rules in clause 1 of Schedule 7 or clause 1 of Schedule 9 of the Metrology Procedure respectively.
(c) The responsible person must ensure that the energy data is substituted where:
(i) the metering installation installed at a customer's metering point can not be read due to access limitations and in this situation the responsible person has the discretion to use a self read in preparing the substituted value;
(ii) the energy data collected for a type 1 to 4 metering installation fails the validation test conducted in accordance with paragraph (b), in which case the interval energy data is substituted in accordance with clause 3 of Schedule 7 of the Metrology Procedure;
(iii) the energy data collected for a type 6 metering installation fails the validation test conducted in accordance with paragraph (b), in which case the consumption energy data is substituted in accordance with clause 3 of Schedule 9 of the Metrology Procedure;
(iv) there has been a failure of the metering equipment, or the metering equipment has been found to be defective, or interference to the metering equipment has occurred, in which case the energy data for a type 1 to 4 or type 6 metering installation is substituted in accordance with clause 3 of Schedule 7 or clause 3 of Schedule 9 of the Metrology Procedure respectively;
(v) an inspection or test on the metering equipment has established that a measurement error exists, in which case the energy data for a type 1 to 4 or type 6 metering installation is substituted in accordance with clause 3 of Schedule 7 or clause 3 of Schedule 9 of the Metrology Procedure respectively; or
(vi) an estimated read is permitted in accordance with clause 9.4.3(s), in which case the energy data for a type 6 metering installation is substituted in accordance with clause 3 of Schedule 9 of the Metrology Procedure.

### 9.4.5 Deleted

### 9.4.6 Calculation of energy data for type $\mathbf{7}$ metering installation

(a) The responsible person must ensure that energy data for a metering installation type 7 is calculated in accordance with a distribution entity's procedure.
(b) The responsible person must ensure that the energy data for a type 7 metering installation, which is calculated in accordance with paragraph (a), is validated in accordance with a distribution entity procedure.
(c) The responsible person must ensure that the energy data is substituted in accordance with a distribution entity procedure where the energy data calculated for a type 7 metering installation fails the validation test conducted in accordance with paragraph (b).

### 9.4.7 Data storage

(a) The responsible person must retain records of the characteristics of metering equipment for seven years after that metering equipment has been removed from service.
(b) The records specified in paragraph (a) may be held in electronic form.
(c) The responsible person must make available the records specified in paragraph (a) to the $Q C A$ if requested in writing by the $Q C A$. The $Q C A$ must only use those records for the purpose of performing an audit of the metering equipment.
(d) The responsible person must ensure a metering installation database containing energy data in respect of a type 6 metering installation is provided, in accordance with the service requirements in Schedule 5 of the Metrology Procedure.
(e) To avoid doubt, the energy data for a type 6 metering installation is the data collected from the meter in accordance with clause 9.4.3, and/or substituted in accordance with clause 9.4.4.
(f) The rights of access to the data held within the metering installation database are set out in clause 7.7 of the National Electricity Rules and in clause 9.4.7(f) of this Code. For a type 7 metering installation, the right of access to the data is specified in a distribution entity's procedure.

### 9.4.8 Information

(a) The responsible person must ensure that energy data is provided to the area retail entity and the distribution entity for each metering installation that is installed in relation to a connection point or point of supply that relates to the area retail entity or the distribution entity, respectively.
(b) The responsible person must not hinder an isolated generator's or customer's access to metering equipment for the purpose of reading the meter display.
(c) A customer of an area retail entity may request its energy data from that area retail entity. With respect to this energy data:
(i) the area retail entity must not unreasonably withhold the energy data from the customer;
(ii) the area retail entity must store the energy data for a minimum of two years;
(iii) the first request for energy data by a customer for the previous two years will be provided free of charge by the area retail entity;
(iv) the area retail entity may impose a reasonable charge for providing energy data on any request from the customer if the customer has been provided with its energy data within the 12 month period prior to the request; and
(v) if the request is for energy data beyond two years, the area retail entity may apply a reasonable charge for providing that data.
(d) For the purposes of paragraph (a), access to energy data must be provided as follows:
(i) where energy data for a type 1 , type 2 , type 3 , type 4 or type 6 metering installation has been collected in accordance with clause 9.4.3, and validated and substituted in accordance with clause 9.4.4, by 5.00 pm on the second business day after that energy data has been collected.

### 9.4.9 Validation of metering installation database

(a) The responsible person must ensure that a sampling plan is established and maintained, in accordance with Australian Standards "AS 1199: Sampling Procedures for Inspection by Attributes" or "AS 2490: Sampling Procedures and Charts for Inspection by Variables for Percent Nonconforming" to validate that the data stored in the metering installation database for a type 6 metering installation is consistent with the data stored in the meter.
(b) The validation test must be conducted at a frequency in accordance with the sampling plan described in paragraph (a), which must not be less than once every 12 months.
(c) If there is an inconsistency between the energy data held in meter and the energy data held in the metering installation database, the energy data in the meter is to be taken as prima facie evidence of the energy data for that metering point.
(d) Actions in event of non-compliance with accuracy requirements are set out in ID references 3.2-3.4 of Schedule 5 of the Metrology Procedure for type 6 metering installations.

### 9.4.10 Request for testing of the metering installation

(a) If requested by a isolated generator or the area retail entity, the responsible person must conduct a test to determine the consistency of data held in the metering installation database and data held in the meter of a type 6 metering installation.
(b) The responsible person must make available the results of the test described in paragraph (a) to the area retail entity or the isolated generator, as applicable, as soon as practicable.
(c) Where the test undertaken in accordance with paragraph (a) determines an inconsistency, the responsible person must pay the costs of, and associated with, that test.
(d) Where the test undertaken in accordance with paragraph (a) determines no inconsistency, the area retail entity or isolated generator who requested the test under paragraph (a) must pay the costs of, and associated with, that test in accordance with clause 7.3.6(e) of the National Electricity Rules.
(e) Where there is a discrepancy between:
(i) energy data stored in the meter; and
(ii) energy data stored in the metering installation database in respect of that meter,
the energy data stored in the meter or meter/associated data logger is prima facie evidence of the amount of electricity supplied to that metering point.
(f) If requested by an area retail entity or isolated generator, the responsible person must, prior to any test being undertaken in accordance with paragraph (a), provide an estimate of the costs of, or associated with, that test.
(g) Actions in event of non-compliance with accuracy requirements are set out in ID references 3.2-3.4 of Schedule 5 of the Metrology Procedure for type 6 metering installations.

## CHAPTER 10: GENERAL

### 10.1 Definitions and interpretation

### 10.1.1 Definitions

acceptable identification in relation to:
(a) a residential customer, includes one or more of the following:
(i) a driver's licence, a current passport or other form of photographic identification;
(ii) a Pensioner Concession Card or other entitlement card issued by the State or Commonwealth Government; and
(iii) a birth certificate;
(b) a business customer which is a sole trader or partnership, includes one or more of the forms of identification for a residential customer for each of the individuals that conduct the business; and
(c) a business customer which is a body corporate, includes the body corporate's Australian Company Number or Australian Business Number.
accumulation meter has the meaning given in the Metrology Procedure.
actual energy data means the energy data that represents an actual measurement of the flow of electricity in a power conductor.
actual meter reading has the meaning given in the Metrology Procedure.
$\boldsymbol{A E M O}$ has the meaning given in the Electricity Act.
AER Retail Pricing Information Guideline is the AER Retail Pricing Information Guideline - January 2012 Version 2.0, as amended from time to time, and published on the AER website.
area retail entity means a retail entity whose retail authority states a retail area.
Australian Standard means:
(a) in Chapter 9, the relevant standard published by Standards Australia; and
(b) for all other chapters, the Australian Standard AS ISO 10002-2006 as amended and updated from time to time.
bank means an authorised deposit taking institution within the meaning of the Banking Act 1959 (Cwlth).
billing cycle means the regular recurrent period for which a customer receives a bill from a retail entity.

B2B Procedures means the procedures under the National Electricity Rules or as otherwise agreed between the parties, prescribing the content of, the processes for, and the information to
be provided to support communications between the distribution entity and the retail entity relating to a customer or supply of electricity to a customer.

B2B Procedures (service order process) means the procedure set out in the document " $B 2 B$ Procedures (Service Order Process)" which forms part of the B2B Procedures under the National Electricity Rules and defines the standard service order process and transactions data requirements to be adopted by national electricity market participants.
business customer means a customer who is not a residential customer.
business day means a day other than a Saturday, a Sunday or a Queensland wide public holiday (as appointed under the Holidays Act 1983 (Qld)).

CAIDI means the sum of the duration of each interruption (measured in minutes) divided by the total number of interruptions for that distribution entity. This is a measure of the average time (measured in minutes) for electricity supply to be restored to a customer when an interruption has occurred.

CAIDI Limits means the limits calculated as SAIDI Limits divided by SAIFI Limits for that distribution entity. The CAIDI Limits set out in clause 3 of Schedule 1 are provided for interpretive purposes only and do not constitute standards which are enforceable against a distribution entity by individual customers
card operated meter means a meter that contains control equipment that switches on and off in accordance with the amount of credit stored in the meter.

CATS Procedures means the procedures set out in the document "MSATS Procedures: CATS Procedures part 1 Principles and Obligations", issued by AEMO under the National Electricity Rules

CBD feeder means a feeder supplying predominantly commercial high-rise buildings, supplied by a predominantly underground supply network containing significant interconnection and redundancy when compared to urban areas.

Code means this Electricity Industry Code.
communications link has the meaning given in the National Electricity Rules.
compensation period in relation to clause 5.7 .4 is the period commencing on the date the turn off main switch and sticker disconnection is completed for a premises a small customer is vacating and ends on the earliest of:
(a) the date the meter for the premises is read and 11 kWh of energy or greater has been consumed at the premises, provided the distribution entity notifies the financially responsible Market Participant via email or another mutually agreed format within a reasonable time following the meter read;
(b) the date the meter for the premises is read after the distribution entity is notified the NMI has transferred to another financially responsible Market Participant; or
(c) the date the meter for the premises is read as part of a distribution entity completing a service order type of "re-energisation" for the premises.

## connection contract means:

(a) for the purposes of Chapter 9, the contract (either classified as standard or negotiated) that prescribes the conditions of connection between a distribution entity and a generator or customer (as the case may be) when that party connects to the distribution entity's supply network; and
(b) for all other chapters, means any contract under which a distribution entity agrees to provide customer connection services to a customer's premises.
connection point has the meaning given in the National Electricity Rules.
consumption means, for the purposes of Chapter 9 , the annual consumption as determined by a distribution entity.
consumption energy data has the meaning given in the Metrology Procedure.
contract interest rate means, for any year, the bank bill swap rate for one year, as reported in the Australian Financial Review Money and Bond Market section on the first Friday of December of the previous year, less one full percentage point, or such other rate approved by the $Q C A$.
control equipment means the equipment needed to switch a circuit(s) on or off by a device installed or operated by the distribution entity. For example, local or remote timing devices would form part of control equipment. This equipment forms part of a metering installation for the purpose of testing and inspection.
controlled load means those loads that are controlled by means of control equipment, and are separately metered from the remaining load at the connection point. For example, a residential hot water heating circuit will be a controlled load in Queensland and may have a timing device known as the ripple frequency control system.
co-ordination agreement has the meaning given in the Electricity Act.

## credit history information means:

(a) providing the retail entity with permission to obtain a credit check of the credit history of the customer; and
(b) any other information that relates to the credit history of the customer that is reasonably required for the retail or distribution entity to assess the ability of the customer to meet its financial obligations under a retail or connection contract.
current transformer means a transformer for use with meters or protection devices in which the current in the secondary winding is, within prescribed limits, proportional to and in phase with the current in the primary winding.
customer has the meaning given in the Electricity Act.
Customer Charter means the charter prepared by the distribution entity under clause 3.2 or the retail entity under clause 4.5 .
customer connection services has the meaning given in the Electricity Act.
customer information means information relating to a specific small customer obtained by a marketer, its employees, agents or contractors through the process of marketing retail contracts to the small customer, and includes information obtained without the consent of the small customer.
customer retail services has the meaning given in the Electricity Act.
DAPR means Distribution Annual Planning Report.
DAPR date has the meaning given in the National Electricity Rules
data logger has the meaning given in the National Electricity Rules
defective or defect means the condition where the metering equipment does not measure or record the flow of electricity to a level of accuracy prescribed in the National Electricity Rules.
disconnection warning means a notice in writing issued in accordance with clause 3.6 or clause 4.18.

Distribution Annual Planning Report has the meaning given in the National Electricity Rules.
distribution area for a distribution entity is the area specified in its distribution authority as its distribution area.
distribution authority has the meaning given in the Electricity Act.
distribution entity means an entity that holds a distribution authority.
distribution non-network charges means charges of a distribution entity set out in the distribution entity's price list that:
(a) are referable to a specific request by a small customer or its retail entity; or
(b) are referable to a requirement under electricity legislation,
and do not include network charges.
dual fuel contract means a single negotiated retail contract for the sale of electricity and for the sale and supply of gas by a retail entity to a customer.
electrical installation has the meaning given in the Electricity Act.
Electrical Safety Act means the Electrical Safety Act 2002 (Qld).
Electrical Safety Regulation means the Electrical Safety Regulation 2002 (Qld).
Electricity Act means the Electricity Act 1994 (Qld).
Electricity Connection and Metering Manual, ECMM, means the document of that title produced by either the ENERGEX distribution entity or Ergon Energy distribution entity.
electricity legislation means the Electricity Act, Electrical Safety Act, the Electricity - National Electricity Scheme (Queensland) Act 1997 (Qld) and regulations, standards, codes, protocols and rules made under those Acts.

Electricity Regulation means the Electricity Regulation 2006 (Qld).
emergency means an emergency due to the actual or imminent occurrence of an event which in any way endangers or threatens to endanger the safety or health of any person, or normal operation of the supply network or transmission grid, in the state of Queensland or which destroys or damages, or threatens to destroy or damage, any property in the state of Queensland.

ENERGEX means ENERGEX Limited (ACN 078849 055).
energy data has the meaning given in the Metrology Procedure.
energy data services has the meaning given in the Metrology Procedure.
energy price fact sheet is an Energy Price Fact Sheet, within the meaning of the AER Retail Pricing Guideline, relating to electricity prices.

Energy and Water Ombudsman Queensland means the Energy and Water Ombudsman Queensland established by the Energy Ombudsman Act 2006 (Qld).

Ergon Energy means Ergon Energy Corporation Limited (ACN 087646 062).
Essential Energy means Essential Energy established under the Energy Services Corporations Act 1995 (NSW).
excluded locations means the locations specified in Schedule 2.
explicit informed consent is the consent provided by a customer where:
(a) the customer provides express conscious agreement;
(b) the relevant retail entity has fully and adequately disclosed all matters relevant to that customer, including each specific purpose for which the consent will be used; and
(c) all disclosures referred to in paragraph (b) are truthful and have been provided in plain English.
export or exported means the direction of flow of electricity at a connection point or point of supply where that electricity flows from a transmission grid or a supply network into a load, as specified in the National Metering Identifier Procedure published by AEMO.

Fair Trading Act means the Fair Trading Act 1989 (Qld).
feeder type means a CBD feeder, isolated feeder, long rural feeder, short rural feeder or urban feeder as the case may be.
final meter reading means the last recording of actual energy data for a customer when they vacate an address or change retail entity.
financial year means a year commencing 1 July and ending 30 June.
financially responsible Market Participant has the meaning given in the National Electricity Rules.
financially responsible retail entity has the meaning given in the Electricity Act.
first-tier means the status of load when the electricity purchased at a connection point directly and in its entirety from the area retail entity from the NEM and which is classified as a first-tier load in accordance with Chapter 2 of the National Electricity Rules.
fixed benefit period means a period of a negotiated retail contract (where the end date of that period is specified or ascertainable at the beginning of that period) during which a benefit to the customer (such as a price discount) is available.
fixed term means the term specified by a fixed-term contract.
fixed-term contract means a negotiated retail contract which has start and finish dates set expressly under the terms and conditions of that negotiated retail contract.
force majeure event means an event outside the control of a retail entity or a small customer.
FRC commencement date means 1 July 2007.
generator means the operator of one or more generating units that produce 50 hertz alternating current at a voltage suitable for connection to the supply network, where the generating units supply electricity to the supply network without providing any electricity internally to an enduser's load (other than a small amount to operate the generating unit, if necessary).

GSL payment means a guaranteed service level payment to be made in accordance with clause 2.5 for the amounts set out in clause 2.5.10.

GST has the meaning it has in the A New Tax System (Goods and Services Tax) Act 1999 (Cwlth).
guaranteed service level means a guaranteed service level set out in clause 2.5.
hot water supply means a hot water supply connected on a controlled supply tariff, for example Tariff 31 or Tariff 33.

IES generator means an 'inverter energy system' and represents generating units that produce direct current and then convert that direct current to 50 hertz alternating current suitable for synchronising to the power system supplied by the supply network. For example, a solar cell or PV generator or fuel cell, where the direct current produced by these devices in passed through an inverter and transformed to 240 volt single phase 50 hertz alternating current.
import or imported means the direction of flow of electricity at a connection point or point of supply where that electricity flows from a customer or a generator to a transmission grid or a supply network, as specified in the National Metering Identifier Procedure published by AEMO.

Information Exchange Committee has the meaning given in the National Electricity Rules.
in-situ termination means a termination of a retail contract where the customer is not vacating his or her premises.
instalment plan means a plan for a customer to pay to the retail entity, by periodic instalments, all arrears (including any disconnection or reconnection charges) and charges relating to continued usage of electricity but, to avoid doubt, does not include an informal arrangement under which a customer is granted additional time to pay an amount owed.
instrument transformer has the meaning given in the Metrology Procedure.
interruption means any temporary unavailability of electricity supply to a customer associated with an outage of the supply network including outages affecting a single premises, but does not include disconnection.
interruption duration $G S L$ has the meaning given in clause 2.5.9(a)(i).
interruption frequency $\boldsymbol{G S L}$ has the meaning given in clause 2.5.9(a)(ii).
interval energy data has the meaning given in the Metrology Procedure.
interval meter has the meaning given in the Metrology Procedure.
isolated feeder means a feeder which is not connected to the national grid, but excludes the Mt Isa-Cloncurry supply network, as that network is defined in the Electricity Act.

Isolated generator means one or more generating units that are connected to an isolated power system.

Isolated power system means a supply network that does not form part of and is not connected to the national grid and may include an isolated feeder.
large customer means any customer who is not a small customer.
large market customer has the meaning given the Electricity Act.
large non-market customer has the meaning given in the Electricity Act.
LARGE NMI means the description given to a connection point where the flow of electricity at the connection point is equal to or greater than 100 MWh per annum.
life support equipment has the meaning set out in clause 4.20.3.
local holiday means a show holiday or special holiday appointed for a particular district under the Holidays Act 1983 (Qld).
long rural feeder means a feeder which is not a CBD feeder, urban feeder or isolated feeder with a total feeder route length greater than 200 km .
major event day means a day determined under clause 3 of Schedule 1 .
market customer has the meaning given in the Electricity Act.
market NMI means a NMI for which the customer is a market customer.
marketer means a person who carries on the business of marketing retail contracts and includes a retail entity and non-regulated marketer.
marketing includes, but is not limited to, advertising, sales, promotions, market research, public relations, discussions or negotiations by any means in the nature of a personal contact with a small customer whether solicited or unsolicited for the purposes of entering into a retail contract.
marketing complaint means a complaint associated with a retailer's actions in seeking to sign up a small customer for a market contract.
marketing contact means a contact made by a marketer with a small customer for the purposes of marketing a contract.

MDP means either a Metering Provider category D or a metering data agent.
measurement element has the meaning given in the Metrology Procedure.
meter has the meaning given in the National Electricity Rules.
metering data has the meaning given that term in the National Electricity Rules.
metering equipment means network assets that include the meter, current transformer, voltage transformer, associated wiring and fittings that together convert and display the electricity flowing in a power conductor at a location within the local vicinity of that power conductor.
metering installation has the meaning given in the Metrology Procedure.
metering installation database has the meaning given in the Metrology Procedure.
metering point has the meaning given in the National Electricity Rules.
Metering Provider has the meaning given in the Metrology Procedure.
Metrology Procedure has the meaning given in the National Electricity Rules.
minimalist transitioning approach means the approach set out in clause 6.8.
Minister means the Minister under the Electricity Act.
move-in customer means a customer who starts consuming customer retail services from a premises without first applying to a retail entity for the provision of such services. ${ }^{7}$

MSATS means the Market Settlement and Transfer Solution operated by AEMO.
MWh means megawatt hours.
National Electricity Law has the meaning given in the Electricity - National Scheme (Queensland) Act 1997 (Qld).

National Electricity Rules means the rules made under the National Electricity Law applied as the law of Queensland.

National Energy Retail Law means the Schedule to the National Energy Retail Law (South Australia) Act 2011, as in force from time to time.
national grid has the meaning given in the National Electricity Rules
Natural Disaster Relief and Recovery Arrangements means Natural Disaster Relief and Recovery Arrangements, administered by the Commonwealth Department of Transport and Regional Services.

[^5]negotiated connection contract has the meaning given in the Electricity Act.
negotiated retail contract has the meaning given in the Electricity Act.
NEM means the wholesale electricity market operated by AEMO under the National Electricity Rules.

NEM settlements means the process operated by $A E M O$ for clearing the financial transactions associated with export and import of wholesale electricity in the national electricity market.
network charges has the meaning given in the Electricity Act.
NMI has the meaning given in the National Electricity Rules.
NMI checksum means a National Metering Identifier Checksum associated with a NMI.
NMI classification code has the meaning given in the CATS Procedures.
NMI premises has the meaning given in the Electricity Act.
NMI standing data means the approved data items associated with a NMI that are available to prospective retail entities, as specified in the CATS Procedures.
non-market customer has the meaning given in the Electricity Act.
non-market NMI means a NMI for which the customer is a non-market customer.
non-regulated marketer means a person who carries on the business of marketing retail contracts for the provision of customer retail services to small customers but does not have an authority issued by the regulator.
notice period has the meaning given in clause 4.4.5.
notified prices has the meaning given in the Electricity Act.
off peak hot water means hot water which is charged under an off-peak controlled load electricity tariff.

Origin Energy means Origin Energy Electricity Limited (ACN 071052 287).
planned interruption means an interruption for which the distribution entity has, or should have, given a notice under clause 2.5.8 or for which the distribution entity is excused from giving a notice under this Code, or electricity legislation or contractual arrangements with a customer.
point of supply means the point at which supply is established between a distribution entity and a generator or customer as defined in the SAA Wiring Rules (AS 3000).
power system security and reliability standards has the meaning given in the National Electricity Rules.
premises has the meaning given in the Electricity Act.
price change includes any change to a tariff rate or charge or type of tariff applying to a small customer but excludes any change to distribution non-network charges.

QCA has the meaning given in the Electricity Act.
quarter means a period of three months commencing 1 January, 1 April, 1 July and 1 October as the case may be.
regulator has the meaning given in the Electricity Act.
regulatory control period has the meaning given in the National Electricity Rules.
relevant authority means- (a) AEMO; or
(b) State or federal police; or
(c) a person or body who has the power under law to direct a distributor to de-energise premises;
remote acquisition has the meaning given in the National Electricity Rules.
residential customer means a customer who acquires electricity for domestic use.
responsible person has the meaning given under the National Electricity Rules.
retail area has the meaning given in the Electricity Act.
retail authority has the meaning given in the Electricity Act.
retail contract means either a standard retail contract or negotiated retail contract.
retail entity means an entity that holds a retail authority and, if a person is providing customer retail services as a retailer of last resort, that retailer of last resort.
retailer of last resort has the meaning given in the Electricity Regulations.
SAIDI means the sum of the duration of each interruption (measured in minutes) divided by the total number of customers (averaged over the financial year) of that distribution entity.

SAIDI Limits mean the limits set out in clause 1 of Schedule 1.
SAIFI means the total number of interruptions divided by the total number of customers (averaged over the financial year) of that distribution entity.

SAIFI Limits mean the limits set out in clause 2 of Schedule 1.
salesperson means an employee or contractor acting on behalf of a marketer in the marketing of retail contracts, and salespeople has a corresponding meaning.
sampling plan has the meaning given in the Metrology Procedure.
scheduled meter reading means the meter reading on a cycle that equates to the customer's billing cycle, usually monthly or quarterly.
second-tier means the status of load when electricity is purchased at a connection point in its entirety other than directly from the area retail entity or the NEM and which is classified as a second-tier load in accordance with Chapter 2 of the National Electricity Rules.
security deposit means an amount of money or other arrangement acceptable to the retail entity as a security against a customer defaulting on a bill. To avoid doubt, a security deposit does not include an insurance levy whereby a customer makes a non-refundable payment that is used to insure against non-payment by that customer.

ServiceOrderSubType has the meaning given in the B2B Procedures: Service Order Process established under Clause 7.2A. 3 of the National Electricity Rules.
service order request mean a request for service raised in accordance with the B2B Procedures (service order process) as applicable to Queensland, or as otherwise varied by agreement between the parties in accordance with the National Electricity Rules.
short rural feeder means a feeder with a total feeder route length less than 200 km , and which is not a CBD feeder, urban feeder or isolated feeder.
small business customer means a customer who is both a small customer and a business customer.
small customer has the meaning given in the Electricity Act.

SMALL NMI means the description given to a connection point where the flow of electricity at the connection point is less than 100 MWh per annum.
small residential customer means a customer who is both a small customer and a residential customer.
special meter reading means an actual meter reading that occurs at a time other than the time of a scheduled meter reading.
standard co-ordination agreement has the meaning given in the Electricity Act.
standard connection contract has the meaning given in the Electricity Act.
standard retail contract has the meaning given in the Electricity Act.
standard service order means a category of service activity as defined in the B2B Procedures (service order process) as applicable in Queensland.
substituted means the substitution of an actual meter reading under the circumstances described in clause 9.4.4(c).
substituted meter reading means a meter reading for which the energy data has been substituted.
supply network has the meaning given in the Electricity Act.
system operator means a person who $A E M O$ has appointed as an agent under Chapter 4 of the National Electricity Rules and who is registered as a system operator with AEMO under Chapter 2 of the National Electricity Rules.
termination notice has the meaning given in clause 4.4.1.
transmission grid has the meaning given in the Electricity Act.
turn off main switch and sticker has the meaning given in the B2B Procedures: Service Order Process established under Clause 7.2A. 3 of the National Electricity Rules.
unique match means the return of a single set of NMI and NMI Checksum in response to a request made by a retail entity under clause 6.4.1(a) of this Code.
urban feeder means a feeder with annual actual maximum demand per total feeder route length greater than 0.3 MVA/km and which is not a CBD feeder, short rural feeder, long rural feeder or an isolated feeder.
vacation notice has the meaning given in clause 4.4.2.
voltage transformer means a transformer for use with meters or protection devices in which voltage across the secondary terminals is, within prescribed limits, proportional to and in phase with the voltage across the primary terminals.
wholesale market customer is a market customer in the wholesale market as defined in the National Electricity Rules.
$\boldsymbol{Y}$ Value means the value of the variable ' $y$ ' that applies to the type 6 metering installation, as specified in Schedule 3 of the Metrology Procedures.

Other grammatical forms of words defined in the dictionary are taken to have a corresponding meaning.

### 10.1.2 Interpretation

Unless the contrary intention appears, a reference in this Code to:
(a) (headings) headings are for convenience only and do not affect the interpretation of this Code;
(b) (variations or replacement) a document (including this Code) includes any variation or replacement of it;
(c) (clauses, schedules and annexures) a clause, schedule or annexure is a reference to a clause in, or schedule or annexure, to this Code;
(d) (reference to statutes) a statute, ordinance, code or other law includes regulations and other instruments under it and consolidations, amendments, reenactments or replacements of any of them;
(e) (law) law means common law, principles of equity, and laws made by parliament (and laws made by parliament include State, Territory and Commonwealth laws and regulations and other instruments under them, and consolidations, amendments, re-enactments or replacements of any of them);
(f) (singular includes plural) the singular includes the plural and vice versa;
(g) (person) the word "person" includes an individual, a firm, a body corporate, a partnership, a joint venture, an unincorporated body or association, or any government agency;
(h) (dollars) $\$$ is a reference to the lawful currency of Australia;
(i) (calculation of time) if a period of time dates from a given day or the day of an act or event, it is to be calculated exclusive of that day;
(j) (reference to a day) a day is to be interpreted as the period of time commencing at midnight and ending 24 hours later;
(k) (meaning not limited) the words "include", "including" or "for example" are not used as, nor are they to be interpreted as, words of limitation, and, when introducing an example, do not limit the meaning of the words to which the example relates to that example or examples of a similar kind;
(l) (next business day) if an event under this agreement must occur on a stipulated day which is not a business day then the stipulated day will be taken to be the next business day;
(m) (reference to anything) anything (including any amount) is a reference to the whole and each part of it; and
(n) (footnotes) footnotes are for reference only and do not affect the interpretation of the Code.

Electricity Industry Code

Schedule 3 - Not used

Consultation note - following table to be deleted.

| Customer type |  |  | Less than 100MWh pa | Equal to or greater than 100MWh pa |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | NMI classification: SMALL | NMI classification: LARGE |
| 1st tier Negotiated Retail Contract | Already on Negotiated Customer Sale Contract (as that term was defined in the Electricity Act 1994 prior to the enactment of the Electricity and Other Legislation Amendment Act 2006) at $1 / 7 / 07$ | Meter type: | n/a | Already has remotely read interval meter. |
|  |  | Meter read as: |  | Remotely read interval meter read as interval meter. |
|  |  | Meter install code in MSATS |  | Remotely read interval meter: COMMS1-4 |
|  |  | Meter data used for wholesale settlement? |  | No |
|  |  | Meter data used in preparation of NSLP (pre peel-off if applicable) on/after 1/7/07? |  | Yes |
|  |  | Is meter data used for CLP calculation? |  | Yes, if meter is registered as controlled load meter. |
|  | Goes on Negotiated Retail Contract on/after 1/7/07 | Meter type: | Accumulation meter existing. <br> Manually read interval meter (comms ready) for new \& replacement. | Must install remotely read interval meter. |
|  |  | Meter read as: | Accumulation meter read as accumulation meter. Manually read interval meter read as accumulation meter. | Remotely read interval meter read as interval meter. |
|  |  | Meter install code in MSATS | Accumulation meter: BASIC Interval meter: BASIC | Remotely read interval meter: COMMS1-4 |
|  |  | Meter data used for wholesale settlement? | No | No |
|  |  | Meter data used in preparation of NSLP (pre peel-off if applicable) on/after 1/7/07? | No | Yes |
|  |  | Is meter data used for CLP calculation? | Yes, if meter is registered as controlled load meter. | Yes, if meter is registered as controlled load meter. |

| Customer type |  |  | Less than 100MWh pa | Equal to or greater than 100MWh pa |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | NMI classification: SMALL | NMI classification: LARGE |
| 2nd tier (all contract types) | Already on retail contract at $1 / 7 / 07$ | Meter type: | n/a | Already has remotely read interval meter. |
|  |  | Meter read as: |  | Remotely read interval data |
|  |  | Meter install code in MSATS |  | Remotely read interval meter: COMMS1-4 |
|  |  | Meter data used for wholesale settlement? |  | Yes |
|  |  | Meter data used in preparation of NSLP (pre peel-off if applicable) on/after 1/7/07? |  | Yes |
|  |  | Is meter data used for CLP calculation? |  | Yes, if meter is registered as controlled load meter. |
|  | Goes on retail contract on/after 1/7/07 | Meter type: | Accumulation meter existing. Manually read interval meter (comms ready) for new \& replacement. | Must install remotely read interval meter. |
|  |  | Meter read as: | Accumulation meter read as accumulation meter. Manually read interval meter read as accumulation meter. | Remotely read interval meter read as interval meter. |
|  |  | Meter install code in MSATS | Accumulation meter: BASIC Interval meter: BASIC | Remotely read interval meter: COMMS1-4 |
|  |  | Meter data used for wholesale settlement? | Yes, profile will be applied if meter is registered as BASIC | Yes |
|  |  | Meter data used in preparation of NSLP (pre peel-off if applicable) on/after 1/7/07? | No | Yes |
|  |  | Is meter data used for CLP calculation? | Yes, if meter is registered as controlled load meter. | Yes, if meter is registered as controlled load meter. |

## Notes

- "Comms ready' refers to manually read interval meters that are capable of having a communication device added so they can become part of a type 4 metering installation without replacing the mete
- An interval meter, whether manually read or remotely read, once installed, must not be replaced by an accumulation meter.
- A remotely read interval meter may only be converted to a manually read interval meter if the consumption drops below 100MWh per annum

Ergon Energy does not have a controlled load peel-off in its distribution area.

## Schedule 4 - Maximum charges (clause 3.10)

These maximum charges are prescribed by section 226 and schedule 8 of the Electricity Regulation

[^0]:    1 A distribution entity's right to recover a GSL payment from a retail entity is provided for in the co-ordination agreement.

[^1]:    2 In-situ termination refers to the situation where the retail contract is terminated but the customer continues to occupy the premises.

[^2]:    4 The amount charged may be the subject of a maximum charge under the notified prices, Electricity Regulation or Schedule 4.

[^3]:    5 The amount charged may be the subject of a maximum charge under the Electricity Regulation or Schedule 4.

[^4]:    6 This is subject to the transitional provisions in clause 5.7.3(e).

[^5]:    7 Under the Electricity Act a small customer is taken to have entered into a standard retail contract under section 51(2) where the customer has not applied for customer retail services under section 48C but the customer's premises are connected to a supply network.
