

I live in North Queensland where we have one choice only for our providers of Electricity. As usual the Queensland regional areas are always ripped off with supply of services and we want something done about the ELECTRICITY!!!!

Below is a list of Electricity Increases since 2009 when they started rising drastically under Labor.

Increase July 2009 = 15.66%

Increase July 2010 = 13.307%

Increase July 2011 = 6.59%

Increase 10th July 2009 to 12th July 2012 = 35.56%

Increase July 2012 = 11.5%

Increase July 2013 = 15.85%

Decrease July 2014 = 5.058%

Ergon increased their service fee by a huge 87%. Something is definitely wrong there!!! The service fee was as 27 cents per day back in 2011 and in 2018 was around \$1 per day.

Unfortunately this was only up until 2014. I have not kept a strict check since then intend to do so for future reference.
