

## Email submission on draft determination of notified electricity prices

15 May 2024

B. Sutherland, 4870 QLD

Regional Qld residents must have equity with Brisbane residents. It is totally unacceptable that off peak rates for charging evs is not same as Brisbane. An EV owner should have access to cheap ev off peak charging without paying more in peak periods for general electricity use. Also it is not acceptable to have control of ev charging times without consent of property owner.

Regional consumers deserve same rates as Brisbane consumers! Stop treating us as second class consumers!!
